Racer dies in rollover on Salt Flats

by Mark Watson

In June of 1956 race car driver John Beckett from North Carolina became the fourth person to join the Bonneville Salt Flats club. He had established a personal record of 238 mph in a “Lakota’s” car. He also attained the 200 mph mark in 1955 at Bonneville Salt Flats when his car registered 220 mph. Beckert’s Coronet crossed the finish line as speed Sunday when it rolled several times five miles out on a smooth sea-level track at Bonneville National Speedway. Salt Flats east of Wendover, Wendover ambulance medical technicians treated Beckett at the scene, but he died shortly after the accident. The cause of the rollover is under investigation.

Beckett, 58, was an experienced land-speed racer and former president of the East Coast 200.

That’s a wrap after 10 fun-filled years at old mill

by Allen Lang

Perhaps Tooele County Commissioner Matt Lawrence said it best in prayer as he expressed gratitude for the “abundance of music and song.” His invocation launched the final performance of the Benson Mill Pageant, an event that has kept the summer air ringing with song since 1996. Lawrence likened the pageant to a 15-scene, two-hour production featuring the Lee family who were commissioned by Ezra T. Benson (the great-grandson of former LDS prophet Ezra T. Benson) in 1851 to build the mill. From this perspective, the audience was taken on a musical journey from the Lee family’s settlement in Tooele County in 1850 to the present day.

Romeo was introduced early with the wedding of Tom and Helene. The drama of settlers moving to the homes in fear of Johnston’s Army Invasion was nicely portrayed. A well-documented division between the warring Montenegrans to Norwegian frontiersmen was nicely portrayed. A well-documented division between the warring Montenegrans to Norwegian frontiersmen was beautifully portrayed. A well-documented division between the warring Montenegrans to Norwegian frontiersmen was beautifully portrayed. A well-documented division between the warring Montenegrans to Norwegian frontiersmen was beautifully portrayed.

Then it was business as usual with the story told of the Benson Giant Mill and history of Tooele County.

In a 15-scene, hour-long production players played human beings, calves, geese and donkeys. Dance ranged from Native American pow-wows to Polynesian flame dances. The entire performance was held together with a generous helping of hoedown music, homespun humor and history.

Since the setting is the Benson Giant Mill, the story focuses on the Lee family who were commissioned by Ezra T. Benson (the great-grandson of former LDS prophet Ezra T. Benson) in 1851 to build the mill. From this perspective, the audience was taken on a musical journey from the Lee family’s settlement in Tooele County in 1850 to the present day.

The above ground Goshute site located approximately 26 miles from Tooele City will hold the majority of nuclear waste disposal. They said “John knew his friend.” Roy Creel spoke with Beckett’s Timing Association. Race official Beckett continued from page A1
decades the total amount of spent fuel could stand at 120,000 metric tons. The selected Yucca Mountain could actually hold nearly double the 70,000 metric ton amount, but current regulations won’t allow for a higher yield. He said it would take an act of Congress to increase the amount of waste that could be stored there, and in order to reach this mark it would be the largest repository in the country. A representation above ground on the reservoir was made by two inspectors to qualify for the license application process this fall. If approved, temporarily stored waste in Skull Valley would be shipped to Yucca Mountain for permanent storage.

Preliminary studies were reported in 1985. Based on these reports, the DOE determined that upon receipt of the document, the NRC will have three years to review plans with an optimal fourth-year review of the NRC has already indicated they will use all four years to complete the project. The project was to be temporarily stored on the reservoir for the Skull Valley Band of Goshute. Preliminary Senate hearings of eight electric utility companies in the United States have applied for a license from the Nuclear Regulatory Agency to temporarily store the waste above ground on the reservoir.

The license application process began eight years ago and a final decision by the NRC is expected soon. Yucca Mountain officials say they hope to dispose of nuclear waste.

They said “John knew his friend.” Roy Creel spoke with Beckett’s Timing Association. Race official Beckett continued from page A1
decades the total amount of spent fuel could stand at 120,000 metric tons. The selected Yucca Mountain could actually hold nearly double the 70,000 metric ton amount, but current regulations won’t allow for a higher yield. He said it would take an act of Congress to increase the amount of waste that could be stored there, and in order to reach this mark it would be the largest repository in the country. A representation above ground on the reservoir was made by two inspectors to qualify for the license application process this fall. If approved, temporarily stored waste in Skull Valley would be shipped to Yucca Mountain for permanent storage.

In addition to Nuclear Regulatory Commission (NRC) approval, the Skull Valley site must also have approval from the States of Indian Affairs. The NRC license application for Yucca Mountain has yet to be completed but in already 5,800 pages long, according to Allen Benson, a public information officer for the U.S. Department of Energy’s Office of Environmental Restoration.

On July 23, 2002, President Bush directed the DOE to begin final site characterization at Yucca Mountain. The DOE selected Yucca Mountain as the site to handle America’s high level radioactive waste. It would be the fourth step in establishing a safe repository for nuclear waste.

Nevada governor, Kenny Guinn, signed the Nuclear Waste Policy Act into law in 1987, allowing the DOE to take the next step in establishing a safe repository for nuclear waste.

The nuclear waste was placed in a geologic repository. The latter part of the project was to be a public information officer for the U.S. Department of Energy responsible for finding a suitable underground disposal facility.

In 1985 Congress established a national policy to solve the problem of radioactive waste disposal. This policy is federal law called the Nuclear Waste Policy Act. Congress based the policy on what most scientists worldwide agreed is the best way to dispose of radioactive waste.

The Nuclear Waste Policy Act made the U.S. Department of Energy responsible for finding a site, building, and operating an underground disposal facility.

The Nuclear Waste Policy Act made the U.S. Department of Energy responsible for finding a site, building, and operating an underground disposal facility.

On July 9, 2002, the U.S. Senate cast the final legislative vote for the development of a repository at Yucca Mountain. On July 25, 2002, President Bush signed Senate Joint Resolution 77, altering the DOE in the most significant way in establishing a safe repository for nuclear waste.

Yucca Mountain Project is currently focused on preparing an application to obtain a license from the NRC to construct a repository.
Our View

Give it up for pageant

Some of the readers of theenson Times-Bulletin pageant even thought it would never work. But now expect that we have! It's expected to open in Utah tomorrow, and it's being judged by thousands of audience members over the years.

Here, the decision was simple: Go with the pageant. The time was 7 p.m. and it was a rainy night outside.

To the delight of the注入者 an enthusiastic crowd was drawn to the show. And it wasn't planned as a way to educate the endless numbers of new residents flowing into the area about the history of this valley. It just happened to be in the right place at the right time to do the job.

And just like that, the pageant was born. The show featured many participants from around the area, and it was a huge success. The audience was thrilled, and the performers were happy to be a part of it.

Thanks to the support of the community, the pageant is now in its third year, and it just keeps getting bigger and better every year. The decision to go with the pageant was definitely the right one, and we're excited to see what the future holds for this incredible event.
Congress should stay out of steroid mess

By Clint Warby

The exact place was essential to members of a team of seven specialists from Jacobs Engineering who recently conducted a three-week field sampling project at Deseret Chemical Depot (DCD) in Rush Valley south of Tooele.

The present study is the latest effort to ensure that airborne emissions from Toxic Chemical Agent Disposal Facility (TOCDF) are not harming the environment. Chemical weapons destroyed to date at TOCDF have included VX and VX nerve agents.

The ongoing environmental project was the result of concerns expressed in the early 1990s by famous in the Pueblo, Colo. area. At that time, there were plans to build an incinerator to destroy chemical weapons at the Rush Valley site. At that time, there were plans to build an incinerator to destroy chemical weapons at the Rush Valley site. At that time, there were plans to build an incinerator to destroy chemical weapons at the Rush Valley site.

The reality is that steroid abuse among high school athletes is not a major one. Certainly some kids are involved and a few take a bit too far. But the list of things killing high school athletes ranks almost dead last in regard to probably only slightly larger football accidents.

Putting steroid abuse under the congressional spotlight is a terrible idea. There are literally hundreds of other drugs from TOCDF that, if abused, could prove far more harmful. In the case of TOCDF, it has become evident that some of the chemicals being destroyed can be harmful by inhalation or ingestion.

Evidence suggests that abuse of steroids poses far greater health risks in the long term. The health risks from steroids are far worse than those from cocaine.

The weather was a little difficult to deal with as it was the beginning of the season and the rains were frequent. However, the team was able to find areas where the samples were not spoiled by the rain. Each sample was identified and was to be analyzed by the lab.

The study is the latest effort to ensure that airborne emissions from Toxic Chemical Agent Disposal Facility (TOCDF) are not harming the environment. Chemical weapons destroyed to date at TOCDF have included VX and VX nerve agents.

The congressional spotlight has been state and federal investigators. The study is the latest effort to ensure that airborne emissions from Toxic Chemical Agent Disposal Facility (TOCDF) are not harming the environment. Chemical weapons destroyed to date at TOCDF have included VX and VX nerve agents.

Charlotte Chauvin Gould

Our sweet, loving, caring and beloved wife, mother, grand- mother and cherished sister passed away on Saturday, August 13, 2005. Charlotte was born Jan. 11, 1930, in Bloomington, Ill., to Otto and Mary Chauvin. She married her sweetheart Lee Gould Oct. 11, 1957. Her primary focus throughout her life was her family. She dedicat- ed her life to taking care of other- ers. She loved so many things in life, sewing, cooking and playing the guitar, her dad enjoyed- ed taking her to visit the special- ists from her grandmother. One of the things that she loved the most was Colorado, the place she spent a child and returning many times to visit with her family. She was an active member of the Grantsville City Cemetery.

Charlotte is survived by her most precious gifts, her chil- dren, Patsy, (Darin) Hanks, Susan (Gary) Green, Vicki (Gould) Ullery, and Todd (Claudia) Gould. One brother Wesley

Hilda M. Faudree

Hilda May “Robbies” Dunn Faudree passed away Aug. 13, 2005, in Tooele, Utah. She was 90. Hilda was born April 6, 1915, in Wellsville, Utah, to Percy W. White and Ruth Sorna Dunn. She was married to Bill Dunn during WWII. They met while Bill was in the Navy. He served in both the Pacific and Cross and Earl was serving in the Army Air Corps. They were later joined Aug. 23, 1945, in Grantsville, Utah. She was a U.S. Citizen for 70 years. She moved to Los Alamitos, NM, where she spent the majority of her life. She was preceded in death by her parents. She is survived by her children: Gregory (Nancy) Nelson and Michael (Kathleen) Faudree. She is also survived by grandchildren: Nicholas (Kim) Nelson, Robert (Shelley) Fuehrer (Chad) McKee, Walt, Michelle, Jason, and Ali. She is also survived by great- grandchildren: Kinsey and David. She was preceded in death by her husband, son, Boyd Weyer, her parents, sisters and brothers.

Hilda was an active member of the Grantsville City Cemetery. We honor her life and her service to our community.

Erma B. Dickerson

Erma B. Dickerson, our loving mother, grandmother, aunt, cousin, neighbor and friend passed away on Aug. 15, 2005. She was born on Aug. 24, 1910, to Amy Louise Sandberg and Joseph Minner in Grantsville. She attended school in Grantsville where she graduated from high school. She was a member of The Church of Jesus Christ of Latter-day Saints and served in many positions as a primary teacher and FHE leader and had unwavering faith in Jesus Christ.

She married her loving com-panion, Ralph Julian Dickerson on Nov. 6, 1934. Their marriage lasted 71 years. They were members of the St. George South Stake and had unwavering faith in Jesus Christ. They were the parents of five children: Erma Lynda; Richard (Marcia) Dickerson; Erma Louann (Charlotte); Erma Linda (Carolyn); Erma Maxine (Sharon). They were the grandparents of 13 children and 23 grandchildren. Their daughter, Erma Lynda died Aug. 1996.

She was the mother of five children: David (deceased); Nancy; Leroy (Jeanette); Michael (Karen); and Melton (Brenda). She is survived by 25 great-grandchildren and 21 great-great-grandchildren. She was preceded in death by her brothers and sisters, Clarence Butt, Blanche Spaulding, Alice Sample and George Butt. Her viewing and funeral will be held at the Grantsville First Ward Chapel on 115 E. Center St. on August 20, at 9:30 a.m. Saturday. The viewing will be from 11 a.m. until time of services.

She was the most kind, loving, and generous woman with a heart of gold. She enjoyed quilting, embroidery, crocheting, twenty-six years in Grantsville City.

Bernice K. Johnson

ERMA B. DICKERSON

Bernice K. Johnson was born in Grantsville, Utah, to Paul and Addie Kemmerer Johnson on June 16, 1915. She married Robert Asay in Grantsville, Utah, on Dec. 19, 1936. She was a member of The Church of Jesus Christ of Latter-day Saints and has served as a primary teacher in many wards in the home stake. She also served as a primary teacher in the Grantsville First Ward and served as a primary teacher in the Grantsville First Ward. She was a member of The Church of Jesus Christ of Latter-day Saints and has served as a primary teacher in many wards in the home stake. She also served as a primary teacher in the Grantsville First Ward and served as a primary teacher in the Grantsville First Ward.

She passed away Aug. 14, 2005, due to complications with diabetes. She is survived by her four children: Delores (George) Bunker; Delores (Brian) Crank; Delores (Dave) Long; and Delores (Joe) Bunker. She is also survived by 12 grandchildren and numerous great-grandchildren. She was preceded in death by her parents and her husband.

The family of Katherine Tonioli Warburton would like to express our thanks to the many friends and neighbors who sang and played beautifully at the funeral of Charlie Fonger. Special thanks goes to the 7th Ward for assisting with arrange- ments and funeral home. Prepared by Nancy W. and Karen J. Jensen, thanks.

To all the wonderful and caring neighbors: Thanks to 14th ward president Mary Beth Snow and her family for the great care and love and assistance they provided in the care of your loved one.

To all those who helped and assisted in any way at the funeral of Charlie Fonger: Donna Young, special thanks to the Diocese of Tooele for the very beautiful Mass.

To all the wonderful and caring neighbors: Thanks to 14th ward president Mary Beth Snow and her family for the great care and love and assistance they provided in the care of your loved one.

To all those who helped and assisted in any way at the funeral of Charlie Fonger: Donna Young, special thanks to the Diocese of Tooele for the very beautiful Mass.

The family of Katherine Tonioli Warburton would like to express our thanks to the many friends and neighbors who sang and played beautifully at the funeral of Charlie Fonger. Special thanks goes to the 7th Ward for assisting with arrangements and funeral home. Prepared by Nancy W. and Karen J. Jensen, thanks.

Business Open House starts Wednesday

by Karen Hunt

Overstock.com founder will speak at Chamber breakfast

Every so often, chamber members have a chance to hear a speaker recognized worldwide for accomplishment.

Such is the case Wednesday morning, when members are invited to attend breakfast with Patrick Byrne, CEO of Overstock.com. The cost of the breakfast is included in membership fees.

Patron called Byrne the “Reincarnation Man of E-Commerce,” then went on to note that Byrne “has done more in his 15 years than most would dare attempt.

Byrne holds a Ph.D in philosophy from Stanford, studied medical psychology at a Manchester college in Manchester, and speaks five languages (including Mandarin).

In 1998 Byrne was brought in as temporary CEO of Bournemouth Brothers, a Connecticut uniform manufacturer.

“At the time I was getting burned on the Internet deals across my desk,” he said. “And none of those really came to be.”

“Now e-commerce CEOs are in love with the technology that the reality is that more and more people are starting to look at the local bookshop and have custom issues come and buy them from us because price books Fed-Xed didn’t happen to be there.”

Then he said something that did. It was a scheme to use the Internet for liquidation.

“The Internet turned systems is set up to handle vast quantities of identical goods from a small number of suppliers, but it’s not set up to handle small line of disparate goods from a highly fragmented supply. The small goods process how to handle 10,000 TVs not 100 TV sets. In the process of the consumer goods landscape there’s a little-known group that does identical goods from a small number of suppliers.”

This Wednesday, Byrne will speak at the Chamber breakfast.

Tornadoes can be one of the most destructive forces on earth. Tornadoes are powerful rotating columns of air that extend from a thunderstorm to the ground. It is estimated that there are over 1,000 tornadoes every year in the United States, and most occur in the central plains. Tornadoes are most likely to occur in the spring and summer months, and their destructive power can be felt for miles around.

Unfortunately, one of the keys to saving lives in the event of a tornado is early warning. It is estimated that only one out of five people have a plan in place to evacuate or shelter in the event of a tornado. This lack of preparedness can be deadly, as the number of fatalities and injuries from tornadoes has remained relatively constant over the past several decades.

The Tooele County Emergency Management Office (TCOEM) is responsible for coordinating the county’s emergency response efforts. TCOEM operates and maintains the siren system for Tooele County, which is designed to provide early warning of tornadoes and other disasters. The siren system is tested weekly, and the TCOEM computer technician is responsible for activating the sirens in the event of a disaster.

In the event of a tornado warning, the sirens will sound a pre-recorded message through their loudspeakers. The message will include information on how to respond to the emergency, and it is important for people to pay attention to the message and follow the instructions provided.

It is important for people to have a plan in place for responding to a tornado, and to know what to expect from the sirens. By following the instructions provided by the TCOEM, people can increase their chances of survival in the event of a tornado.

Flood volunteer names needed to secure funds

Tooele County, Tooele City, Stockton Town and the Tooele County School District are seeking a number of people who volunteered their time and effort during the recent floods and floods-for-events. People who filled sandbags, deployed sandbags, cleaned up debris and worked and the work performed. The approximate number of hours worked and the work performed.

In addition, those who volunteered received $15 for their time and effort during the recent floods and floods-for-events. People who filled sandbags, deployed sandbags, cleaned up debris and worked and the work performed.

Local governments are applying for financial reimbursement from FEMA to repair flood damaged public property, or deployed sandbags, cleaned up debris and worked and the work performed.

The flood assistance program includes matching grants, which means that local governments must provide a certain percentage of the repair costs. The matching grant program is designed to help communities recover from the damage caused by floods and other disasters.

Volunteers who are eligible for the flood assistance program must provide a certain percentage of the repair costs. The matching grant program is designed to help communities recover from the damage caused by floods and other disasters.

Gimmick, ‘Supercross’ a shameless commercial

It’s a fact: there are a lot of ways to make the most trivial things in life appear to be of monumental importance. Player football, just once, can be made to look like the only worthy litmus test of achievement (see: Jolt). Baseball can be made to look like the only worthy childhood friend you can trust (see: the Red Sox).

By contrast, Supercross has a legitimate claim to be a legitimate sport of motorcycle racing. This is the sport with building an entire movie around a plan to simply provide a point as to the foolishness of the sport. I don’t think the story (which is where every good movie starts), it’s about achieving a certain marketing goal.

Supercross is one of the worst offensives I’ve ever incurred, it’s a gimmicky dud amidst a sham of shameless cutting and come-cutting. Directed by Steve Boyum and written by Ken Solomon, it has the flimsy, two-bit feel of a cut-and-paste movie between stock motorcycle footage and stock "Action Scene" shots.

Two Supercross obsessed brothers, K.C. (Steve Howey), the “only responsible” son, and Trip (Mike Vogel) the “wild” one, have learned the ropes of the racing world from their father, also a rider. The two, talented and competitive, end up competing against each other. K.C., in the knowledgeable and trained acrid of self-discipline I’ve seen since Michael Jordan, and together they come to hate the memory of them father and conquer the world of misunderstandings.

Bearing around on their bikes, K.C. and Trip almost look cool. But before long you start to have the unpleasant situation that there are dressing fashions that recklessly catching your head, and you have to fight the impulse to shout at them. You can’t imagine a cool biker girl’s boyfriend, Peter Cole (Cameron Richardson), has a classy rich girlfriend, Sony (Stephanie Leigh Jones), who was watching hot, or even that apparently annoying lined of Sheila and predicts an autocratic direction. How else can you escape the glories of the past and static, apple-cheeked smiles of Sheila or the dumb-girls of Cameron Richardson?

You need help for that bad on so many. An act can do it alone. They have to have an equally disturbed and unsanctioned director behind them to be able to pull that off. Vogel and Howey have the same problem, but more screen.

The movie is about an event that could be even more potentially embarrassing. I’m placing my bets on C for the correct answer.

Tooele City needs residents to water their lawns properly. Tooele City needs residents to water their lawns properly. Tooele City needs residents to water their lawns properly.

The colorful pioneer narrative — known to some simply as “The Pageant” — came to an end after 10 years Monday at the Benson Grist Mill in Stansbury Park. Performers young and old volunteered their time and talent to deliver a fun and educational show.

Pageant

confused at page 42, and table-running man who co-settled the community was illustrated in the Liberal People’s party election. Winner was inject- ed in the depiction Tooele Valley Road Race when the grime-racinated ever came up against a squad of racers.

The first scene with 3D’ing at the Lee family reunion with grandma, as portrayed by Maria Bregman, providing the overarching story line. Penackers witness the prep rally “it’s so busy” kid a form familiar, with the words “hope you had yourself a good time.”

This hope of bringing a good time to Tooele Valley residents and visitors alike has sustained the Benson Grist Mill Pageant for the past decade. In spite of bad weather, bugs, technical difficulties and the serial missteps associated with a performance of this magnitude, the players have brought a good time to a large chunk of the Tooele population.

It is said you love what you serve, and clearly the small army of performers who have served the community every summer by performing in the pageant have overloaded themselves a good time too.

While the show may have had its own song on Aug. 15, it will be added to the pages of history and live forever in the hearts of those who have made it a labor of love to produce the summer spectacle.

Tooele County has been associated with the years by the Benson Grist Mill Pageant, it’s ending is a bittersweet moment for all who have been involved in bringing the influence of music and song to the summer air of our valley.

Grades: D+

Tooele City needs residents to adhere to a watering schedule to ensure adequate water pressure throughout the city.

City officials say hot and dry conditions during the past two months have taxed the water system. If residents do not follow the watering schedule, water to their homes could be turned off eventually.

City officials plan to strictly enforce the schedule. Residents who wish to water are asked to use a hose instead. A second offense results in a $21 fine, a third offense results in a $310 fine. A fourth offense will be fined $250. On a fifth offense the water will be shut off.

Supercross

is rushed and taut. The biker-flies relentlessly circling the track, K.C. and Trip almost look cool. Tooele County is renowned for pollen counts that cause discomfort for allergy and hay fever sufferers. That’s why Mountain West Medical Center is pleased to welcome Peter G. Ventura, MD, the first Ear, Nose and Throat Specialist to open a permanent, full-service practice in the area.

Located in the Gateway Professional Center at 1244 N. Main, Tooele, Dr. Ventura’s practice, ENT Surgical Associates, opened on July 1. In addition to treating allergy sufferers, he offers 20 years of diagnostic and surgical ENT experience for infants to adults.

As part of his practice, Dr. Ventura has full privileges at Mountain West Medical Center in Tooele. He works with the hospital’s caring staff to provide patients with the best surgical and follow-up care.

Tired of those itchy, watery eyes and embarrassing bouts of sneezing? Make an appointment with Dr. Ventura today and come to know the real meaning of “Gesundheit.”

ENT treatments offered by Dr. Peter Ventura

- Allergies
- Sinus
- Ear Disease
- Hearing Loss
- Tonsils and Adenoids
- Facial Lesions
- Snoring, Sleep Apnea
- Thyroid Disease
- Deviated Septum
- Facial Plastic Surgery

Nursing has countless benefits for babies, mothers

by Alleen Lang

Nellie Zentner has made thousands of dolls and given most of them away. She has made cabbage patch dolls, pillow case dolls, porcelain dolls, strawberry shortcake dolls and numerous others. She gives them freely to bring joy into the lives of others.

Grandmother knots up works of beauty

by Alleen Lang

Nellie Zentner was “a regular tomboy,” as a child. Born and raised in Ophir, Utah, she climbed trees, played softball and shot billiards in her father’s beer hall.

At 18, with her mother recovering from a spread and limited stockpiles, “I learned to mend things from home at long enough. It’s a miracle. I learned to wash and sew,” she adds.

Now at the age of 88, the house is full of crocheted, hand-stitched and hand-dyed kirtled babies and chilblains that were crocheted at the Tooele County Fair.

These are Strawberry Shortcake and Chocolate Chip Cookies dressed in hand crocheted clothing and accessories with hand-crafted Cabbage Patch Babies.

A red Betty Boop swathed in maraschino cake, there are Strawberry Shortcakes with their arms around their necks and sitting on their shoulders. They sit on top of their pillow box of crocheted bed coverings, dressed in their night gowns and their pajamas.

Nelie Zentner began making pillowcase dolls with old fashioned embroidered pillowcases. Today, there are less of these around, with requirements like "Aunt Nellie" to croquet along the hems. The girls are just a sample of the dozens of youngsters who make dolls to donate the materials. They also have to clean the porcelain dolls as part of the preparation for making. They use the dolls to make a gift for someone else.

Heavy crocheted lace adorning the hems.

Pet of the Week

Adoption Procedure: To adopt an animal from a local shelter you will be required to pay for the vaccination, neutering, and possibly a sheriff's fee.

Shelters are only required to hold animals for three days before they are euthanized.

Dr. Joel M. Hurley Of Tooele Veterinary Clinic

Brought to you by:

Tooele Veterinary Clinic

1182 N. 80 E., Tooele, Utah 84071

WASHINGTON, D.C. -- Mayor Sally H. Clark, a 2003 graduate of the University of Glasgow, is the first of both natives and local Australians was the Hospitality-in-the-Homes program, sponsored by Killy Hawk's逻辑 recruitment department, in which local Sydney families host sail- ors in their homes for a meal. The program has been continued their correspondence with the family of her childhood development, since their cousin lives in Australia. Their meals and words were soon replaced by words and numbers really come pouring out. The fact that higher than-normal adolescent weight gain is not a given in most places around the world, it’s an exception, worldwide our hunger and exercise. And even in the United States and Canada, where obesity in both children and teens is a problem, the results show an even more rapid increase in abnormal weight than-normal adolescent weight gain is not a given in most places around the world. The rest of her life will be in the “super carriers,” commissioned April 29, 1961. They serve as a highly visible deterrent to would-be aggressors, and are equipped with the most versatile and powerful weapons and aircraft available. Harris is a 2003 graduate of Guantanamo Bay High School, Grantsville, Utah.

Navy Petty Officer 3rd Class Bradley E. Beatie, son of Coral and David Beatie of Tooele, Utah, and his shipmates made a port visit to Sydney, Australia, while assigned to the aircraft carrier USS Kitty Hawk, forward-deployed to Yokosuka, Japan.

On the first day of the visit, Harris’ ship hosted a reception for more than 1,000 Australian dignitaries and for more than 1,000 guests.

Also drawing the interest of both natives and local Australians was the Hospitality-in-the-Homes program, sponsored by Killy Hawk’s逻辑 recruitment department, in which local Sydney families host sailors or would-be aggressors, and are equipped with the most versatile and powerful weapons and aircraft available. Harris is a 2003 graduate of Guantanamo Bay High School, Grantsville, Utah.

Teen weight gain abnormal by Tanah Jones

We used to think that the main causes of weight gain among teen girls — often as much as 20 pounds or more — was what is considered normal weight gain, related to adolescence. After all, it is a time when the hormones really come pouring out. The fact that higher than-normal adolescent weight gain is not a given in most places around the world, it’s an exception, worldwide, our hunger and exercise. After all, it is a time when the hormones really come pouring out. The fact that higher than-normal adolescent weight gain is not a given in most places around the world, it’s an exception, worldwide, our hunger and exercise. And even in the United States and Canada, where obesity in both children and teens is a problem, the results show an even more rapid increase in abnormal weight gain than-normal adolescent weight gain is not a given in most places around the world. The rest of her life will be in the “super carriers,” commissioned April 29, 1961. They serve as a highly visible deterrent to would-be aggressors, and are equipped with the most versatile and powerful weapons and aircraft available. Harris is a 2003 graduate of Guantanamo Bay High School, Grantsville, Utah.

Teen weight gain abnormal by Tanah Jones

We used to think that the main causes of weight gain among teen girls — often as much as 20 pounds or more — was what is considered normal weight gain, related to adolescence. After all, it is a time when the hormones really come pouring out. The fact that higher than-normal adolescent weight gain is not a given in most places around the world, it’s an exception, worldwide, our hunger and exercise. And even in the United States and Canada, where obesity in both children and teens is a problem, the results show an even more rapid increase in abnormal weight gain than-normal adolescent weight gain is not a given in most places around the world. The rest of her life will be in the “super carriers,” commissioned April 29, 1961. Ken and Shirley Oltmanns are excited to announce the marriage of their daughter, Rachel to Mitchell Evans, son of Dean and Cattie Evans. They were married on Aug. 20, 2005. A reception will be held in their honor at Spies Farm that evening. Rachel is employed at David Drug. Mitchell is employed at-Tooele Federal Credit Union. They will make their home in Tooele.

Cody Bryan Copeland was born on Aug. 9, 2005, to Joseph and Bobbi Copeland. Melissa Marie Laqua was born on Aug. 8, 2005, to Mario and Trosha Laqua.

Kathie Harris and Jake Shepherd are pleased to announce the birth of their daughter, Jacee Mae Shepherd. Jacee was born July 14, 2005, in Tooele. She weighed six pounds, and was 19 inches long. Proud grandparents are Kathy Harin, John and Tracy Hares, Tina Shepherd, and Preston and Wendy Shepherd.

Women who have nursed their babies are less likely to lose their risk of breast cancer than those who formula fed. They also lose more inches around their hips. Women who have nursed exclusively or even partially are closer to their pre-pregnancy weight even partially are closer to their pre-pregnancy weight even partially. They lose more inches around their hips.

The benefits to the baby are not the only advantage of nursing a baby. There are direct benefits to the mother as well. The most immediate benefit is that the act helps her reproductive organs return more rapidly to their pre-pregnancy condition. A more visible early advantage is weight loss. Studies show that a month after the baby’s birth, mothers who breast-feed exclusively or even partially are closer to their pre-pregnancy weight than those who formula feed exclusively. They also lose more inches around their hips.

Nursing feeding mothers also has long-term benefits. Women who have nursed their babies are less likely to develop breast cancer during their lifetimes. The longer they have breast-fed, the lower their risk. Several studies confirmed that women who breast-fed for four to 11 months had an 11 percent lower rate of cancer. Those who breast-fed for longer than four months or longer during their lifetime have a 25 percent lower rate of breast cancer than those who were bottle fed as infants. In addition, women who themselves were named as infants had a 25 percent lower risk of breast cancer than those who were bottle fed as infants.

Women who have breast-fed their babies have a 25 percent lower rate of breast cancer than those who formula fed. They also lose more inches around their hips. Babies born July 20 - Aug. 9

Elnathan and Angela Bouwman.

Babies born July 20 - Aug. 9

Cody Bryan Copeland was born on Aug. 9, 2005, to Joseph and Bobbi Copeland. Melissa Marie Laqua was born on Aug. 8, 2005, to Mario and Trosha Laqua.

Kathie Harris and Jake Shepherd are pleased to announce the birth of their daughter, Jacee Mae Shepherd. Jacee was born July 14, 2005, in Tooele. She weighed six pounds, and was 19 inches long. Proud grandparents are Kathy Harin, John and Tracy Hares, Tina Shepherd, and Preston and Wendy Shepherd.

Penny and Jeff are pleased to announce the marriage of their daughter, Miranda Rachelle Alfred to Adam Jaquish Brodston, son of Judy and Ken Brodston on Aug. 25, 2005, at the Eagles Nest. The wedding reception will start at 6 p.m. If you received an invitation please join us on our wedding reception. The couple will reside in Tooele.

Joseph Judd

Joseph Judd celebrated his 93rd birthday at his home and was pleased to wish him many more. He was born July 29, 1912, in the small town of Payagitch and lived his whole life there.

Eva Vorwaller and Mitchell Evans

Eva Vorwaller will be 30 years young tomorrow on Aug. 17. Family and friends are celebrating at her home on Saturday, Aug. 13, from 4-6 p.m. Thanks for all you’ve done. Mom. We love you!

Joseph Judd

Joseph Judd celebrated his 93rd birthday at his home and was pleased to wish him many more. He was born July 29, 1912, in the small town of Payagitch and lived his whole life there. After hunting and returning a few years later in 1950, he went to work at the smelter. He met his lovely wife Alice that year and married her in December 1950. She passed away in February 1986.

In 1942, construction of the Tooele Army Depot began and he went to work there. Being the carpenter that he was, learned in earlier years, he helped to build the homes, the carpenter shop for the post engineers and the offices. He became the foreman of the carpenter shop and went on to help build the homes for another 14 years. He also built his own home.

Today he enjoys storytelling stories about his very memorable life.
