Concert costs continue to rise
Tooele County expenses for Country Explosion now exceed $100,000

by Tim Gillie

Nearly two months after Country Explosion ended, a baseball field at Desert Peak Complex remains unpayable and a $141,000 bill for damages, repairs and services remains uncollected.

“The full or damages has been given to Country Explosion’s insurance company, and we are waiting to see what they do with it,” said Tooele County Commissioner Jerry Hurst. “On the meantime, the field is not usable.”

In addition to the $63,100 bill to Country Explosion, the county commission approved mid-year budget adjustments, at Tuesday night’s commissioner meeting that included a Country Explosion related expense.

The adjustments included a $14,100 allocation from the tourism tax fund for baseball equipment to help put the turf at Desert Peak Resort across from the four-day concert that was held July 17-20. The $14,100 allocations for fertilizer was not included in the $63,100 bill for damages to the facility and services provided to Country Explosion by county employees, according to Hurst.

“This is a separate amount that will not be billed to Country Explosion,” Hurst said. “This is part of the normal wear and tear on the facility.”

The Tooele County Sheriff’s Office has also billed Country Explosion $32,000 for security personnel, and $14,000 for dispatch services, according to Sheriff Frank Park.

That brings the total for damages, wear and tear, and services to $141,000.

Tooele County collected $60,000 from Country Explosion.

City moves ahead to complete wells
The Tooele City Council has approved a contract to complete the construction of a pair of wells with the potential to greatly increase the city’s water capacity.

The council voted unanimously Wednesday night to sign a more than $400,000 contract for the construction of a well house and pump line for the newly completed well at the BT and Sugar Bottoms Grounds, in addition to 2020 city staff’s decision to pay for a $1.0 million to an irrigation company for a well.

The well has already cost the city more than $4 million to complete and was available for municipal assignment — but Tooele City Engineer Paul Hansen has said that the well has great potential to increase the city’s water capacity, making it possible to sell the new water.

Moratorium set on plot sales at farm
Decision involves recent cemetery expansion north of Clark Farm

Amendment to the Tooele City cemetery code has set a moratorium on plot sales at the portion of the Clark Historic Farm slated to become a burial ground.

In a split vote preceded by a heated discussion, the council voted to temporarily ban the sale of graves in the field north of the Clark Farm.

Councilman Scott Sorensen made a motion to accept the city’s cemetery code, which specified or restricted policies and procedures on emission hours, allowed monuments and senior duties, and proposed adding the amendment for selling plots at the Clark Farm for two years. Councilman Neil Critchlow seconded the motion.

August: Wettest month of the year?

August received 2.34 inches of precipitation across 15 rainy days last month, compared to a seasonal normal of just .94 inches for the same time period.

Tooele Valley received 2.34 inches of precipitation across 15 rainy days last month, compared to a seasonal normal of .94 inches for the same time period.

“Most of the time, we see these diaries on a death note,” said Amanda Lawrence, an adult/pediatric flight nurse for AFD who helped rush Hinckley to the University of Utah hospital that day. “These are not things we see on a patient who is discharged.”

Hinckley, 20 weeks pregnant, had suffered a placental abruption and emergency medical technicians, she survived against nearly insurmountable odds.

On June 10 of that year, Hinckley, then 23, took a nap after church. She awoke a little late and called her husband, Josh, who was in a different part of the house, and told him she was bleeding.

Commission sets new site criteria for moving state prison

The commission charged with finding a new location for the state prison failed to adopt criteria to guide the process in a meeting at the state capitol Wednesday.

“...they have waived, and we have protested, but it is a protest that we have not succeeded in addressing it,” said Sen. Jerry Stevenson, R-Layton.

The commission will continue to look at financing for the new prison during the 2015 session of the Legislature.

The commission voted unanimously to approve the new criteria, which still require legislative approval.

The commission will continue to look at financing for the new prison during the 2015 session of the Legislature.

The commission’s next meeting will be Wednesday at 10 a.m. at the state capitol.
Loose connection causes power failure for 2,500 area homes

By Lisa Clifton

The southern portion of Tooele City went without power Wednesday as city crews worked to repair connections that had come loose.

The power outage began at 12:15 a.m. when line connections became loose, cutting power to about 2,500 customers, said Margaret Oler, a spokesperson for Rocky Mountain Power.

‘‘There were some connections where the line is in contact with some equipment that had to be repaired — they had come loose,’’ she said. ‘‘The repairs were completed and power was restored to customers.’’

The outage disproportionately affected portions of the city south of Utah Avenue. Power was restored at 7:45 a.m.

Oler said the loose connections were the product of time and weathering on the equipment.

‘‘The connections are out in the weather, and they’re exposed to the sun and the wind and the rain and the snow,’’ she said. ‘‘It was just something that occurred over time and (certainly) responded just as quickly as it happened and got it taken care of.’’

This is the second power outage in the county to cut the lights for more than 2,000 customers.

On Aug. 22, a pole fire and burning cross on the Stansbury Park-Lake Point area took out power for 2,627 customers in the northwest corner of the county for just over two hours.

Broccoli spaghetti causes Interstate 80 closure

By Lisa Clifton

An early-morning spill sent highway traffic into a panic as a semi-truck swerving off Interstate 80 southeast of Grantsville’s Main Street (Interstate 80) collided with a mountain, setting off a domino effect that left 2,500 area homes without power.

Kent Turner said the tanker, reportedly carrying about 4,000 gallons of diesel and a small amount of jet fuel, went through a barrier near the Tooele-Salt Lake County line between 2 a.m. and 2:30 a.m.

The impact tore open the truck, allowing about 300 pounds of broccoli to fall out, he said.

‘‘The driver, who was not injured, may have fallen asleep at the wheel,’’ Royce said. ‘‘He appears that the driver may have fallen asleep,’’ he said.

‘‘I believe it’s a little emotionally up and down. It’s a little out of order, it’s a little out of place, you’re working on the facility. Getting things in order, getting things going again, it’s a little out of place. ’’

The loose connections were a product of time and weathering on the equipment.

‘‘The connections are out in the weather, and they’re exposed to the sun and the wind and the rain and the snow,’’ she said. ‘‘It was just something that occurred over time and (certainly) responded just as quickly as it happened and got it taken care of.’’

This is the second power outage in the county to cut the lights for more than 2,000 customers.

Grantsville DUI checkpoint nets arrests and citations

By Lisa Clifton

Police backed up traffic in Grantsville Friday evening in an effort to catch drunk drivers. Officers from the Grantsville City Police Department, Utah State Park and the Utah Highway Patrol, stopped 838 cars during a DUI checkpoint.

Drivers were screened on Grantsville’s Main Street from 6:11 p.m. Wednesday to 7:11 a.m. Thursday.

‘‘It’s very unfortunate you can’t keep this stuff under control,’’ said Officer đường trong 28, a member of the Grantsville department. ‘‘A lot of people laugh when you hear about drunk driving, or you’re engaged in that unsafe practice. ’’

‘‘There are so many different things about driving under the influence that you either lose your license or you get fines or you have to go to jail. ’’

‘‘You’re slowing down the road and wanting to get there and it’s just as fast as you can get there. ’’

‘‘There are a lot of things you’re doing while you’re driving under the influence, and it’s very unfortunate you can’t keep this stuff under control.’’

‘‘It’s very unfortunate you can’t keep this stuff under control. ’’

‘‘We’re trying to keep DUI enforcement year-round instead of just on holidays,” he said.

Along with the two-police vehicle, a Blood Alcohol Testing unit on wheels — known as a BDOT — was at the checkpoint for use with any DUI cases.

Interviews and any testing, including of breath, blood and urine, between officers and suspects are filmed and monitored for a DVD by use in prosecution, said Trooper Michael Hancock, BDOT technician.

Hancock, who works with the DUI checkpoint said none of the drivers were arrested for DUI.

Despite the complete absence of arrests, officers are encouraged to keep up enforcement year-round, especially considering the storm and severity of the situation.

‘‘Every once in a while you’ll get someone who’s angry,’’ she said. ‘‘It depends on how they’re dealt with. If you’re respectful with people, most of the time everybody’s pretty nice. They just want to have the drug and move on. ’’

‘‘We add, “I feel bad for the people because they’re made a mistake, and for some of the people, if they had two other DUI’s (in the last 10 years), it’s feeling.” ’’

Another two people were arrested for DUI at the checkpoint, including one who had been drinking in the presence of drugs, said Turner. ‘‘I think the guys down there at the center of the state work fairly well. ’’

The History of Tooele County

Tooele County is the largest county in the state and was created in 1852.

The county was formed from portions of Utah and Juab counties. The county seat is Tooele.

The county has a total area of 2,319 square miles. The county boundary was set in 1907.

The county is divided into 56 townships.

The county is divided into 56 townships.

Tooele City appoints new head for parks, recreation

by Emma Penrod

TOOELE STAFF WRITER

After what Mayor Patrick Dunlavy described as a lengthy review of more than 30 applications, Tooele City has officially selected a new director of parks and recreation.

The city council voted unanimously Wednesday night to appoint Brian Roth, former superintendent of the Oquirrh Hills Golf Courses, as the city's new director of parks and recreation.

Roth will replace former parks and recreation director Kathy Bell, who announced earlier this summer that she planned to retire after spending her entire nearly 40-year-long career with Tooele City.

Bell started working for the city at age 14, as part of a summer youth program that had her gathering words on Main Street and assisting with other city beautification projects.

Dunlavy said he had reviewed the resumes of several well-qualified candidates after Bell announced her retirement, but said that many of the applicants were living outside the Tooele area and repeatedly to Roth's application. "Why would I go outside the community if I have everything I'm looking for right here?" the mayor said and asked himself.

Editor's note: Look for a profile on the city's new director of parks and recreation in an upcoming edition.

The Tooele City Council voted unanimously to approve a contract to complete the construction of a pair of wells at the Bit and Spur Rodeo Grounds. The photo of the rodeo grounds well above was taken in September 2013 during the well's construction.

The Tooele City Council voted unanimously to approve a contract to complete the construction of a pair of wells at the Bit and Spur Rodeo Grounds. The photo of the rodeo grounds well above was taken in September 2013 during the well's construction.

Former Oquirrh Hills golf course superintendant Brain Roth was named Tooele City director of parks and recreation.

Laska (Daly) Schroemges

Look who is turning 80 years young (actually 29 again)

Come and join us, her children Laurie, Christy, Ann, Kurt and John, as we celebrate her life. We are having an open house at the Tooele Moose Lodge, 1100 East Vine Street, on Saturday, September 13th from, 12:00-3:00pm.

Light refreshments will be served. No gifts please.

Congratulations on an amazing life spent well spent!
I'll also describe my latest adventure that I took to be a story for the newspaper.

I recently traveled to the West Desert and found myself traveling to a different place, where the terrain is harsh and the climate is extreme. The desert is a challenging environment to traverse, and it’s important to be prepared and have some sort of purification measure with you if prepared and have some sort of water. I think I will need and times I will calculate the amount necessary supply points at either end of the trip. If you plan on exerting yourself, be boiled, treated with iodine or filtered before use. Point is this: Be prepared and have some sort of purification measure with you if prepared and have some sort of water.

Ibapah (elevation 6,662 ft) is just north of Tooele and is the highest point on the Pony Express Trail. This is a distance of more than 300 miles of dusty, hot desert. Make sure that you take plenty of water — at least a gallon per person — if you plan on exerting yourself. It’s almost as if you have traveled to another planet.

In favorable weather, I strongly recommend a 4x4 vehicle. Road conditions sort of Camp Floyd can be unpredictably predictably — especially if it rains or snows, as it is better to have more robust vehicle. Flat tires on a common occurrence along the trail. You can be left without a vehicle if you are caught in the wide open desert.

Road surfaces and conditions deteriorate markedly once you leave the pavement. These are lonely roads in a storm and if you are caught in the wide open desert — you could be on your own for a long time. In fact, many people have been killed out on the trail when they were caught in desert weather and could not move their vehicle. Lightning is also dangerous — especially if it rains or snows, as it is better to have more robust vehicle. Lightning is also dangerous — especially if it rains or snows.

Be careful, inform someone where you are going, the route you will follow, and when you expect to return. Be cautious of strangers as well. Most of those you meet along the trail are good and decent people, but you should constantly be aware of your situation and surroundings. Always travel in a group, and if you have a firearm, take it along if you are properly trained and have license to carry. I am always armed on the desert.

Jim's employee of the month always has a positive attitude and is a joy to work with. They are described as someone who will do any job without complaining and is willing to help wherever and whenever regardless of location. The individual possesses multiple qualifications and is an asset to site operations. The person takes safety and compliance seriously, wants to see the job done right the first time, and is always watching out for fellow coworkers. Please congratulate CHRIS LEYVA on being selected by his peers as Jim's Employee of the Month.
WATERDOWN, Mass. (AP) — It is 20 feet up to the thin red mound that serves as a launch pad for the flying trapeze. But the spatial cue is small and the image of swirling orange, yellow and red is the one that matters, the one that is most likely to have been involved in an accident or fatalities. All the data shows that the driving while impaired by marijuana is, at the very least, not as safe as driving while impaired by alcohol alone. The use of marijuana alone may be enough to impair the judgment and overall coordination, making it more difficult to drive safely. Drivers who use marijuana are more likely to have been involved in an accident or fatalities compared to those who drive under the influence of alcohol alone.

The sheriff said he is not sure how the flying trapeze event will go, what is certain is that all the flying trapeze money is being spent on the baseball field. There are some areas of the baseball field that need to be resurfaced and the area that is covered with the stage was trampled, according to Mark Mercier, Tooele County parks and recreation director.

THE SHERIFF HEARD THAT the event, and received a $10,000 security deposit, according to the contract. The baseball field at Desert Peak in which the main stage was located. Two water lines were damaged and there were broken gages for the sparkless system and missing splinter head on the baseball field.

**Dispatchers**

In the last few weeks, the poor, aging, cicatrized village had been reduced to a state of entropy. With the entire community living in the same house, the constant din of voices and the smell of smoke filled the air. It was a nightmarish scene, but one that the villagers had come to accept as a way of life.

As the sun set, the village was bathed in a warm, orange glow. The villagers sat around the bonfire, telling stories and singing songs. They were all that was left of the once-flourishing village, and they were determined to keep their way of life alive.

The story of the village, and the story of the community that had built it, was one of resilience and hope. Despite the many challenges they had faced, the villagers had continued to thrive and to support each other. And as long as there were villagers left, the story of their village would continue to be told.

9-foot Joe Frazier statue rising in Philadelphia

PHILADELPHIA (AP) — Beloved Joe Frazier has up every day in Philadelphia to take photos with a statue of Rocky Balboa, the fictional heavyweight fighter made famous by Sylvester Stallone.

"Will they line up for pictures with a sculpture of real hometown champion Joe Frazier?"

"Probably promoted, I think it would be much, much bigger than Rocky," said Borden Haisl, who was visiting the city recently. "Rocky is a movie. But Joe Frazier's name, though as a great boxer he enthusiastically of my youth." He questioned how "It's a bit silly to have a statue of 'Smokin' Joe' that captures the movies were 'part part of my youth.' He questioned how "It's a bit silly to have a statue of 'Smokin' Joe' that captures the spirit of Philadelphia very famous, but he could get beat up ... so that he could achieve what he wanted," Layne said. "I think that was just an inspirational thing to watch." Frazier won the 1960 Olympic gold medal in Tokyo and later was inducted into the International Boxing Hall of Fame. Layne won one of the knockouts. "He was the best," said the artist. "I think he was the best." Layne said they are thrilled with Layne’s project because of the shared Philadelphia connection, and a sense that artists, too, must be fighters to survive in their field. Layne created the sculpture of Frazier in his studio in the Fishkill neighborhood. Layne, who was raised here, both attended and taught at the city's renowned Pennsylvania Academy of the Fine Arts. He said he felt drawn to the Frazier project because of the shared Philadelphia connection, and a sense that artists, too, must be fighters to survive in their field. The Stallions took the title in both the boys and girls sides, but it’s still too early to talk about the Stallions winning a state championship. SHS has finished top two in eight meets this season. The Stallions cruised to dominating victories in both sides, with perfect 15-point scores. Bear River took second with 53, spoiling Stansbury’s attempt at a perfect 15-point score.

The only top 3A team Stansbury faced on the girls side was Park City. PCHS senior Alyssa Snyder won the meet in 17:27.5 and helped her team finish 3A school to field a full seven of SHS runners who all finished in the top eight.

Junior Maggie Beazer won the top runner from all other teams, taking fifth at 20:44.6 and spoiling Stansbury’s attempt at a perfect 15-point score. Stansbury won with 134. Tooele took second with 116 and Ben Lomond third with 78, Grantsville with 55, Bear River second with 53, Grantsville third with 90, and Bear River junior Luke Summers.

In many ways, the construction bid Dan Snarr made on a childhood friend’s roof was the most important job of his life.

Snarr, who had been working in construction and as a sort of jack-of-all-trades since he was 11, ended up spending more time talking to the friend’s father—a sculptor—and expressed an interest in his work.

The result of that conversation sits on a shelf in his studio: a cowboy riding a bull, captured mid-buck in bronze.

“He gave me a box of clay and sent me home and told me to see what I could come up with, and I came up with that bull and used it to shape the first time I took it, but he kept critiquing it and telling me where I needed help,” Snarr said. “Through the years he’s just been a great mentor and a great teacher. I just keep going back and learning more and more. It’s just a happy accident that I was friends with his son going to school. It could have been a lot different. I could have just been a construction guy still.”

Today, Snarr, 50, works full-time as a sculptor. His projects include the bull displayed outside of Tooele High School and not one, but two life-size statues of Theodore Roosevelt, the latest of which will soon be shipped to its new home in Longmont, Colorado.

The path from being given a box of clay to crafting three...
CRITTER CHATTER

Reproduction is not the only interesting fact about praying mantises.

Anyone who has ever owned a dog will tell you that the daily routine can be a delightful chore. When Boston Globe TV critic and author Gilbert began sharing his life with a Yellow Lab named Toby, certain adjustments had to be made. One of those adjustments was frequent visits to his local dog park.

Gilbert — who describes himself as an indoor guy, visually connected to the world through a computer screen — brought his dog to the dog park. As Toby was exploring the visual, digital world of his dog park, Gilbert discovered something new in his life: he liked it! He began looking for a place to share his newfound passion. He soon discovered Armony Park, located in Tooele, and quickly became acquainted with the dog park’s residents.

The dog park became a favorite place for Gilbert to write while enjoying the company of other dog owners and their furry companions. He found that his new hobby not only brought joy to his life, but also allowed him to share his experiences with others through his writing.

As the winter season approached, Gilbert continued to visit the dog park, often accompanied by his own dog, Toby. He found that the dog park was a great place to connect with other dog owners and their pets, as well as a source of inspiration for his writing.

Incorporating the dog park into his life not only provided Gilbert with a new outlet for his creativity, but also allowed him to bond with Toby in a way he never thought possible. The dog park has become a cherished part of Gilbert’s life, and he looks forward to each visit with excitement.

Although the challenges of dog ownership can be daunting, Gilbert discovered that the joy and companionship found in the dog park are well worth the effort. He encourages others to explore the benefits of sharing their lives with a furry friend by visiting their local dog park.

Flora Jane Lawless

Please join us in celebrating Flora Jane Lawless on her 80th birthday, Sept. 13, 2014, from 2-6 p.m. at the Eagle’s Nest. The advantage of being 80 years old is that one has many people to love. Light lunch and dessert. No gifts please.

Tello/Shofield

Nagel/Boren

The parents of Brittany Renee Nagel, Gerald and Leila Critchlow and Bryan and Elaine Nagel, are pleased to announce the marriage of their daughter Brittany Renee to Grant Wilks Boren, son of Gary and Rebecca Boren. They will be married in the St. Paul Minnesota Temple on Sept. 6. Later that day there will be a reception held in the Eagle’s Nest. The couple are both graduates of St. Paul Minnesota Temple. The couple will make their home in Minneapolis, Minnesota, where both are employed.

The miracle of food preservation

I t’s no secret that food preservation has been a priority since the very beginning. The history of how we preserve food goes back thousands of years. The most obvious and basic method of preservation was simply to eat the food as it was harvested. However, that did not always work. During the colder months, most people did not have access to food. So, they had to preserve food in a way that would allow them to eat it later on. The most common methods of preservation were smoking, salting, and drying.

Smoking is a process where the food is exposed to smoke for a certain amount of time. This would cause the food to dry out and become less perishable. Salting is another method of preservation where the food is preserved by submerging it in salt. This would cause the food to lose moisture and become less perishable.

Drying is a process where the food is exposed to heat for a certain amount of time. This would cause the food to lose moisture and become less perishable.

Have to Have a Habitat

byuhan Brown

Just like people, all animals need three things to survive: food, water and shelter. I am a brown pelican—the state bird of Louisiana. Not too many years ago, all of the brown pelicans in Louisiana died out.

Why? Our food, mostly fish, became poisoned by pesticides. Fortunately farmers no longer use these poisons and brown pelicans were brought from Florida to start new colonies in Louisiana.

Pelicans carry fish to their nests. Help Mama Pelican get to the nest by adding the numbers along each path. The path that totals 50 leads to the correct nest.

Pelicans swallow a lot of water when they swallow their prey. When bringing up young, pelicans will  ______ the water and then swallow their prey. Help Mama Pelican get to the nest by adding the numbers along each path. The path that totals 50 leads to the correct nest.

Pelicans carry fish back to the nest in their pouches. Pelicans pouches keep the birds cool. A pelican opens its bill and flutters the sides of its pouch, moving air over the moist insides of the pouch. The moisture evaporates and cools the bird much like the evaporation of sweat cools people’s skin.

Pelicans swallow a lot of water when they swallow their prey. When bringing up young, pelicans will ______ the water and then swallow their prey. Help Mama Pelican get to the nest by adding the numbers along each path. The path that totals 50 leads to the correct nest.

Pelicans swallow a lot of water when they swallow their prey. When bringing up young, pelicans will ______ the water and then swallow their prey. Help Mama Pelican get to the nest by adding the numbers along each path. The path that totals 50 leads to the correct nest.

Pelican Facts

A group of pelicans is known as a squadron or a pod. Pelicans are brown eyes but those will turn blue once they find a mate. They first drain the pouch of water and then swallow their prey. When bringing up young, pelicans will ______ the food on to the nest.

Pelicans swallow a lot of water when they swallow their prey. When bringing up young, pelicans will ______ the water and then swallow their prey. Help Mama Pelican get to the nest by adding the numbers along each path. The path that totals 50 leads to the correct nest.

Pelicans get most of their water from the fish that they eat. Sometimes they drink by holding their beaks open in the rain. Sometimes they drink by holding their beaks open in the rain. They first drain the pouch of water and then swallow their prey. When bringing up young, pelicans will ______ the food on to the nest.

Pelicans get most of their water from the fish that they eat. Sometimes they drink by holding their beaks open in the rain. Sometimes they drink by holding their beaks open in the rain. Bronze

dimensional likeness of former U.S. president, however, has been a long and twisted one.

Stuart earned in construction, but drifted across the country — and the world — taking jobs like training horses, driving trucks, working on trains for VR.

"It sounded like an adventure," something similar that I thought sounded like fun, and I grow old and go do and I get into it into some certain series," he said. "The company that said that I always had a suspicion by me, dressing.

After marrying his wife, Lisa, Snarr returned to construction, where he sized up and then suggested he move on and get some experience working in a foundry, where pieces are cast in bronze, instead.

"It was good to me. I really enjoyed it. I got to do some great things," he said. "I've always drawn, since I can remember I've always drawn done charcoal, things like that," he said. "I haven't done a lot of color work or art at painting — one of my breakthroughs is a really fine painting — and suddenly I might get into it, but I really like the black and white, the forms and textures and stuff. Maybe that's why I'm a sculptor's such a natural fit for me."

However, he said, he quickly learned that being a full-time art in a job like any other. "I'm working in the art business, it's 60 percent business and 15 percent art. That's a whole lot more business than art. There's a few realizations that have come through the art to other art or metal-working. Two years later, he felt he had more confidence in his choice.

"I finally came to the decision that I had to be a foundry man on an artist, and my art's a lot more important than the foundry work to me so I came. If I jumped off the dock and went swimming," he said. "I think I've made it just the past week.

Stuart has had formal training beyond a few workshops done throughout the years has been a valuable resource. "I've always drawn. Ever since I can remember I've always drawn done charcoal, things like that," he said. "I haven't done a lot of color work or art at painting — one of my breakthroughs is a really fine painting — and suddenly I might get into it, but I really like the black and white, the forms and textures and stuff. Maybe that's why I'm a sculptor's such a natural fit for me."

When School is out

Digital Files!

Sculptures take several months to complete, said Snarr, putting in one average of 70-80 hours on a piece of the same size. "I've done some commissions of Children and family members, and stuff, when you do a private person like that, you get to know all the family members all have different perspectives, so you really have to compile one likeness out of 20 different pictures," he said. "It's a lot harder to do a family-type thing, and with children, you have pictures of when they're 3, 7, 10 — and I'd change things so fast. Children are hard to do."

Projects such as the Roosevelt statue are, said Snarr, fairly easy to sculpt, because of the availability of photographs from various angles. Other projects, however, are more challenging in that respect, he said.

Bake a Chocolate Zucchini Cake

by Donna Erickson

1. Grease and flour a 9- by-
13-inch pan. Preheat oven to
350°F.

2. In a large bowl, stir togeth-
er, until well-blended. Add zucchini and choco-
late chips, and blend well. Stir in vanilla and the
eggs one at a time until well-
blended. Divide batter into 2 greased and floured 8-by-
8-inch pans. Bake until a toothpick inserted in the cen-
ter comes out clean.

3. Meanwhile, another child
may measure and sift the flour,
and may measure and whisk the
remaining ingredients. When asked for
directions, he said stir the ingre-
dients. When asked for the
recipe, he said to blend the ingre-
dients. When asked for the
method, he said to add all the
ingredients together and mix.
Economical Ford Fusion Energi has interior of a sport sedan

Auto Digest
by Barbara & Bill Scheffer

The Fusion Energi may be a full-flushed ‘ecomomic’ car, but the interior is sport sedan with heated seats and the driver-favored cockpit that feels more like something out of an aircraft than five passenger sedan. The center stack angles out from the dash to give the driver easier access to audio, climate and communication controls and flows into a higher console which further frames the cockpit feel. The area also has extra storage space.

Using cleaner designs features like moving the instrument panel closer to the windshield, designers seem able to open up the interior space. It’s interesting to note that the EcoBoost has the largest interior space of any Ford Fusion.

The Fusion Energi is called the Compact SUV Segment with a 105-cubit feet. On the downside, the lithium-ion battery takes up about eight cubic feet in half of cargo space.

For the new 2014 model-year, the Fusion Energi is powered by a 1.6-liter 1.2-liter Atkinson cycle engine and an electric motor. Combining, Ford says, the total sustained power is 188 bhp. The electric motor’s 105 miles per hour (MPH) electric range will continue to be a在路上eshed range of 21 miles.

We actually were several miles further, but we live on a hill and the car brought us that same long 200 feet drop in elevation. Conversely, on the way back up the hill we spend about four miles of range to go the same distance. Charging the battery with our 120-volt outlet took about seven hours for a full charge.

The Ford Fusion Energi has interior of a sport sedan

Food assistance programs can help seniors in need

Dear Savvy Senior:

I thought you’d like to share this federal and state programs that can help seniors figure out if they qualify.

Seniors that are eligible for SNAP can help pay for medication, health care, utilities and more. To learn more or apply, contact your local SNAP office—call 866-746-5689.

For more information visit benefitscheckup.org, or call the toll-free help line at 1-800-995-6885.

Food Stamp Programs

The Supplemental Nutrition Assistance Program (SNAP) reaches 46 million people. Households receiving SNAP must currently be below $1,800 per month as an individual, $2,622 for a family of two.

Depending on the person’s current situation, the amount of SNAP benefits may be eligible to the full range between $32 and $125 per month as an individual, or $126 to $361 for a family of two.

To learn more or apply, contact your local SNAP office—call 888-221-5689 for contact information or visit www.fns.usda.gov/snap or call 1-800-222-1526.

Some states also offer emergency SNAP benefits. There are a number of reasons for the lack of participation. Some seniors are too embarrassed or too proud to ask for help. Others think that if they receive SNAP they will be considered poor and are afraid of losing Medicare. With all that said, here’s a run down of which seniors are eligible for SNAP and what they get and how they get it.

When Eligible?

For seniors to get SNAP their “net income” must under the 100 percent federal poverty guidelines. “Net income” is household’s gross income minus allowable deductions. These are a few examples:

- Children under 12 who have $5 per month of food
- Individuals aged 60 and older, or disabled, that are not working, and under $858 per month for an individual (or under $1,716 for a family of two)
- Household receiving TANF or state income in California are also eligible.

The income is figured by taking gross income minus allowable deductions like medical expenses that exceed $35 per month net of pocket, and other costs (rent or mortgage payments, taxes and utility costs) that exceeds half of the household’s income.

In addition to the net income requirement, a few states also require that a senior’s “assets” be below $25,200, not counting the home, security or personal plans, income from SSI or TANF and vehicle (this varies by state). Most states, however, have much higher asset limits or they don’t count assets at all when determining eligibility.

The SNAP pre-screening tool at www.snap4you.com is helpful and can be exchanged for fresh produce. To learn more or apply, contact your local SNAP office—call 866-746-5689 for contact information or visit www.fns.usda.gov/snap or call 1-800-221-5689. 

Other Programs

Seniors that are eligible for food assistance may also be eligible for a host of other programs that can help pay for medications, health care, utilities and more.

To learn more about these programs, visit your local Senior Center, wash your hands.

In Washington, D.C. and Puerto Rico, to seniors, age 60 and older, with gross monthly house-

VIRTUALTOURIST.COM

Travelers are always urged to treat the roads as if you were a tourist, but for VirtualTourist members you must know how often the road has been traveled, how recent the last update was and do along the way that really matters. With that in mind, VirtualTourist have selected a list of five roads worth traveling.

Historic Highway 49, California's "Gold Rush Road" is a must for any traveler who wants to discover the great outdoors. The road enabled an unprecedented exchange of cultures and ideas, philosophies and religions — from textiles, artistic styles and inventions.

The road is a personal tax inversion. If you own state income tax while holding assets in other states, the NING Trust offers you a way out. With a personal tax inversion, you can avoid income tax on your assets and still retain control over your assets. In comparison, a non-grantor trust is where you place assets in the trust and get up sufficient trust income that you are no longer considered the owner of the assets. A grantor trust is a new type of trust created in a new state to avoid or lower income taxes. The trust assets are owned by a grantor trust, which means that you are considered the owner of the assets. With a personal tax inversion, you can reduce state income taxes, and if you feel left out because of what to do about corporate tax inversions, one state has already made this strategy untenable. For example, earlier this year New York state, which was found enabling an estimated $135 million a year, imposed a $1,500 fee on every single state may follow, but until then, if you are someone who the IRS considers to be an in-state resident, tax on your income is only on the assets within the state you are a resident of, and you will want to allow for a road trip of at least several days and you experience a dramatically different landscape each day. While the road is nearly a sealed road in good condition, be prepared for long stretches of gravel and roadwork.

Avoid state income tax with a personal tax inversion

By Robert Pagliarini

Everyday you can choose to think of corporate tax inversions — the tax strategy whereby large multinational corporations shift their assets or company headquarters outside of the United States to avoid paying income tax. The road contained lodging, food and entertainment for people to carry out business and trade. The road contained 53 stations or areas where lodging, food and entertainment were available. Hence, travelers had to show permits in order to pass the Gold Discovery Site. It had to show permits in order to pass the Gold Discovery Site. And it was not just goods that were traded, but the even more valuable commodities of information and knowledge. The Silk Road enabled an unprecedented exchange of cultures and ideas, philosophies and religions — from textiles, artistic styles and inventions.

For example, earlier this year New York state, which was found enabling an estimated $135 million a year, imposed a $1,500 fee on every single state may follow, but until then, if you are someone who the IRS considers to be an in-state resident, tax on your income is only on the assets within the state you are a resident of, and you will want to allow for a road trip of at least several days and you experience a dramatically different landscape each day. While the road is nearly a sealed road in good condition, be prepared for long stretches of gravel and roadwork.

Camino de Santiago, Spain

Discover the ancient past as you travel along the Silk Road, the road that enabled an unprecedented exchange of cultures and ideas, philosophies and religions — from textiles, artistic styles and inventions.
