Nelson drafting legislation to keep prison in Draper

By Tim Gillar

While state legislators inside the Utah State Prison need to be moved, one local legislator wants the state to consider leaving the prison in its present property in Draper.

Rep. Merrill Nelson, R-Grunnestein, has asked legislators to allay concerns in legislation that will allow the Utah Prison Relocation Commission to consider leaving the prison in Draper.

"When the Legislature voted to approve moving the prison, I think a lot of us thought that there would be communities that want the prison," Nelson said. "That hasn't happened.

"Nelson wants the PRC to evaluate the Draper site using the same criteria they used to come up with their list of prospective sites.

However, the Legislature has spent three years studying the prison relocation and came to the conclusion that moving the prison was the best public policy, according to Sen. Jerry Stevenson, R-Layton, co-chairman of the PRC.

"The resolution we passed last year stated several good reasons why moving the prison is in the best interest of the state," he said. "I don't see that any of them have changed."

Rep. Greg Hughes, R-Draper, a member of the PRC and speaker of the Utah House of Representatives, was asked by Emma Penrod, STAFF WRITER

Local air quality measures new EPA rules, but overages persist

By Teresa Pursel

Tooele Valley is expected to retain its nonattainment status for pollution spikes through 2012 despite a declaration the area has complied with new year-long standards for fine particulate pollution.

The Environmental Protection Agency announced last week that air samples from around the state of Utah, including some from Tooele Valley, indicate the area has achieved compliance with new nationwide rules that put greater restrictions on the amount of fine particulate pollution allowed in a given area during a year-long period.

The announcement didn't exactly come as a surprise — unlike many metropolitan areas, Utah does not have a year-long, persistent problem with particulate pollution, said Bryce Bird, director of the Utah Division of Air Quality.

"Fine particulate pollution is just what it sounds like — tiny particles drift in the air. The particles are considered one of the most potentially damaging pollutants because they can slip through the lungs, where they cause irritation and inflammation.

"Because long-term exposure to fine particulates has been associated with respiratory illness, the EPA passed a revised standard in 2007 that further limited the maximum level of fine particulates that would be acceptable in any given area on an annual basis.

"The mayor said the resolution was just a document stating the city's opposition to any prison site located in Tooele Valley, nor does it just reaffirm the city's opposition to the Tooele County Housing Authority's plans to build a prison in Tooele County.
Fire destroys garage, damages home

by Steve Hensley

An electrical fire started in a garage and spread to a home in Rush Valley Saturday night. Flames quickly engulfed the garage, burning to the roof of the house. Once firefighters arrived, they were able to put the fire out within 15 minutes, said Rush Valley Area Volunteer Fire Department Chief Guy Marshall.

The cause of the fire is under investigation.

A third-generation sheep rancher who has called Grantsville home for the last 33 years took the helm of the Tooele County Commission this week.

Blake Bitner was elected chairman of the county commission with a unanimous vote from his fellow commissioners during the commissioners' Tuesday night meeting at the county building.

Bitner is a retired Utah State University professor who has almost 30 years of work with the extension service included. He was also a sheep rancher with a degree in biology and education from the University of Utah.

Bitner also has a master's degree in horticulture from Utah State University.

Bitner takes over as commissioner chairman-tray

By Colin Events

The new Tooele County Commission will meet Tuesday night at the commission chambers on the ground floor of the Tooele County courthouse.

The commission meeting will start at 5 p.m. The meeting is open to the public.

Several community notices will be on the agenda, including:

- A resolution for the Tooele County Museum
- A resolution for the Tooele County Aquatics Center
- A resolution for the Tooele County Library
- A resolution for the Tooele County Recreation District
- A resolution for the Tooele County Health Department

The commission will also consider several appointments and resolutions.

There may be more changes in the county's organizational chart this year, he added.

“[The commission] is the transition year as we look back at the changes that were made the last few years and look forward to what Tooele County needs to look like to best serve the public,” Bitner said. “We want to create a positive atmosphere for our employees and build up as strong a group as possible to serve the public.”

This article is meant to be a starting point for the new Tooele County Commission.

Monsignor Wixted was known for his dedication to the arts and his community. He is remembered for his role in the musical theatre community, particularly in establishing and supporting Catholic high schools that produced musicals. He was known for his involvement in the creation of a modern musical about making musicals, a project that involved the collaboration of priests, community leaders, and local youth. The musical was praised for its innovative approach and its ability to unite people from different religious backgrounds.

**Stansbury High School Theatre Festival**

The Stansbury High School Theatre Festival is a three-week-long event that takes place before the annual Theatre Festival with weeks to go deadline. The festival is written in real life by two playwrights who decide to write a play for a competition about two playwrights who decide to write a play for a competition. The play is titled "The Clean Version" and is about two playwrights who decide to write a play for a competition. The play is titled "The Clean Version" and is about two playwrights who decide to write a play for a competition. The play is titled "The Clean Version" and is about two playwrights who decide to write a play for a competition.

**Inception of Plays:** A musical about the "Inception of Plays," where two playwrights decide to write a play for a competition about two playwrights who decide to write a play for a competition.

**Wixted's Influence:** Monsignor Wixted's influence can be seen in the way he united people from different religious backgrounds in a community and creating a sense of unity and a religious gap in the community. He is remembered for his role in the creation of a modern musical about making musicals, a project that involved the collaboration of priests, community leaders, and local youth. The musical was praised for its innovative approach and its ability to unite people from different religious backgrounds.
Planning commission denies rezone for Stockton Bar gravel pit

The planning commission denies a request from Harper's company to rezone for gravel extraction over 400 acres of property owned by the Harpers sits the Stockton Bar. The planning commission member John Peelak said before he made the motion to reject a request from the county commissioners to deny the rezone request.

By Tim Collie

A loud cheer erupted from the audience at Wednesday’s Tooele County Planning Commission meeting after commission members voted down a request to change the zoning on a gravel pit near the former town limits of Stockton. The commission did not approve a request from Harper’s company to convert the property on the southeast side of the bar to a gravel pit. The requests was denied because it was already included in the current rezone and deny the request, or over- ride the commission’s decision.

The planning commission’s next meeting is scheduled for Jan. 20. Other things, a 19.5 acres of the Tooele County Building at 47 S. Main St. in Tooele was invited to a ridealong by the week after I started, I went home, sleep-deprived and had no way to protect the bar. "Once the rezone happens, we will have no way to protect the bar from Harper’s doing something we will have no way to protect the bar from Harper’s doing something to it or to protect it from a future owner doing something to it. The It is not the best interest of any of us. It is the best interest of the public. There is potential for contaminants from the bar taking place.

The planning commission’s decision came after a lengthy pub- lic hearing during which nearly 20 people came to the podium to talk about the Stockton Bar. As one of the Tooele City attorney representing the Harpers — spoke in favor of the rezone.

People came from South Salt Lake to Tooele County to tell the planning commission what they think about the rezone.

"We if I was36 something to take back the og., California Redwood trees were cut in a logged area in the Redwood Forest area and cut off a great deal of nature’s vegetation. It is a geological history that should be preserved. We can’t replace what the bar is," he said.

In 2011 Harper Companies was successful in getting the county’s property for extraction over 400 acres of property on one of the permits.

Take in a snowfall while snowshoeing in South Willow Canyon

There is no better place to enjoy a serene snowshoe walk than South Willow Canyon in the Stansburys. So when snow finally arrived around Christmas, my wife and I grabbed our snowshoes, learned that spending an hour or so outside in the fresh air will not only improve your mood, but can also be a great form of exercise. It allows you to explore more remote destinations and return to the crowds of hundreds of thousands at ski resorts.

As we approached the Stansburys on Dec. 28, the sky was gray and the mountains were getting pounded by a snow squall. Such weather conditions might deter some, but I was spurred on knowing that snowshoeing awaits in the storm.

We parked the truck, proceed- ed around a locked gate and up the canyon. It was freezing, but not biting. It had the kind of snowfall in which the flakes are large, lightly and lightly land on everything including your face.

From the parking area at the locked gate (U.S. Forest Service, there are several possible locations). The snowshoeing trail begins at South Willow Canyon Campground (ideal for novice snowshoers). You can see your sizing to your experience and conditioning levels. The pro- sium is challenging yourself: you can take four miles to South Willow Campground and continue another 4.2 miles to the 0.81-foot high summit of Desert Peak via Mill Fork.

I only suggest this, however, to the strenuous hikers who are experienced in backcountry travel and possess knowledge of avalanche danger and rescue. If you are strong enough to do this, the rewards are well worth the energy required.

If you prefer something easier, take the six campgrounds in the canyon as destinations. From the gate (and your vehicle) you can hike one mile to South Willow Campground and then continue another 4.2 miles to the 0.81-foot high summit of Desert Peak via Mill Fork.

The trailhead is at the South Willow Salt Creek Campground. If you head south on the trail, you will climb a short steep grade to a high pass that separates South Willow Canyon from Mill Fork. From this pass you can head back on a very nice route. You can head south from Mill Fork, the trails round a low ridge and Mining Peak of South Willow Canyon. This would be a good winter approach to South Willow. This is just the beginning to explore and enjoy the mountain; the snow is now plentiful, grey and cold. On our hike, we saw orange lichens covering box elder tree trunks. And when you see the cemetery on the right, turn left onto West Street 400 West. Follow this road five miles south on what is known locally as the “Mormon Trail” until you come to South Willow Canyon Road. Turn right and head up the drive and into the canyon. The road is paved and usually somewhat unplowed up to the South Wasatch National Forest boundary. Be careful of the snow and the winter in the area. If you plan to park at the upper trailhead, please contact the U.S. Forest Service.

Growing crowds that greet missionaries jam Utah airports

PROVO, Utah (AP) — Most returning Mormon missionar- ies are greeted at the airport by family and friends. But some returning cardholder canary of anyone who could make it.

Lately, the homecomings are more elaborate with professional photographers, balloons, ban- ners, and plane meets and marriage proposals.

The俗etary sometimes is too much for highway security to han- dle without calling the Utah Highway Patrol. The DailyAvalanche reported last week.

Airport officials are trying to figure out the best way to deal with the crowds of hundreds of people who form lines near the airport, block sidewalks and the baggage claim when air travelers return. Officials are also working on ways to defuse the situation.

Airport officials are considering ways to aid the airport's entire service, including a更大 greeting area for all who arrive. The officials are planning how to make the most of the airport's current space.

Airport officials have received more than 10,000 letters and emails about the airport. The airport's gate area has been increased to provide more space for returning missionaries.

Am Chambers, a Utah resident, said she has flown into the Salt Lake City airport every four to five weeks to take care of her mom and also has a daughter who is serv- ing a mission. “It's heartwarming, she said. “It's nice to have a daughter's coming home. They are coming home to the gates. The airport is not going to be able to handle the crowds. The airport is not going to be able to handle the crowds.

Some people said the airport's response was slow and inefficient, but others said it was a great way to welcome their family members home. “It's nice to see your family coming home over the holidays,” one traveler said. “I think it's great the way you can see your family coming home over the holidays.”

Tooele City Mayor Patrick Dunlavy reads aloud the city's resolution that opposes relocating the Utah State Prison to Tooele

Tooele City Mayor Patrick Dunlavy reads aloud the city's resolution that opposes relocating the Utah State Prison to Tooele. Dunlavy said the city council intended to hand-deliver the resolution to the chairman of the PRC and to state lawmakers to remove their property for construction of the prison. "This is not just the Tooele Valley, it's the entire state," Dunlavy said. "We want to protect the water for our personal use."

Air continued from page A1.

Areas in which fine particulate pollution exceeds the new standards are required by federal law to develop a plan to reduce emissions. However, in Utah, where inversion traps gasses from cars, homes and other sources of pollution and allows these gasses to continue to accumulate, pollution is more of a persistent problem.

Consequently, Bird said, the state was able to comply with the new annual standards.

However, because Tooele Valley continues to see spikes of fine particulates that exceed the EPA’s short-term standards for particulate exposure, parts of the county remain designated non-attainment areas for the 24-hour PM2.5 standards.

Bird said local air quality has improved and will continue to do so, but added that the Tooele-Salt Lake combined nonattainment area likely would not meet the national standards until 2019.

“The good news is that air quality in the county is improving, and that is tied to direct health outcomes,” Bird said.

However, Bird said there are currently no standards for ozone in the works that could cause many areas in the state, including Tooele Valley, to be designated nonattainment areas for ozone pollution as well. Ozone is a hazardous chemical produced when sunlight reacts with vehicle-related emissions in the atmosphere.

“While we’re learning more and more about the harmful effects of air pollution, and the standards are becoming more and more protective in response,” he said.

While the state awaits an official decision on ozone from the EPA, Bird encouraged residents to find ways to reduce their personal emissions, such as carpooling or taking public transportation, to prevent the state from exceeding pollution standards.

Additionally, he encouraged residents to attend next week’s public hearing on the proposed statewide ban on woodburning to learn more about what the state Division of Air Quality is doing to comply with national air standards.

That hearing, which will take place next Monday at 6 p.m. at the Tooele County Health Department, will further introduce residents to a proposed statewide measure that would ban the use of all solid fuels, including wood and coal, in all burning devices, including fireplaces, fire pits and stoves, throughout the winter months.

Woodburning is currently banned during summer months or otherwise poor air-quality.

Grantville holds off Summit Academy

by Tavin Stucki

Grantsville earned its fifth win of the season Tuesday afternoon, topping off Summit Academy 55-49.

“I think the girls needed it,” Grantsville head coach Mike Verts said of the win. “Especially after a few losses over the Christmas break, this will be a Big 3A confidence booster.”

Verts was pleased with his Grantsville girls hitting a 3-pointer from long range before the end of the half. He also lauded the defensive performance by Grantsville’s Taylor Anderson.

“She’s a nice player,” Verts said. “They’re young. They’re going to be good for a couple years coming up.”

Summit Academy head coach Matt Mapsteele said the night junior forward Masei Loua hit a 3-pointer from the far side to make it 7-4 Grantsville.

Verts said the Grantsville team defense was better than in the recent past.

“We’ve been talking a lot about doing the little things, defending and boxing out, especially,” Verts said. “I thought our girls did a great job executing that.”

Grantsville turned seven points in the first quarter and held to a four-point lead going into the second quarter.

The Bears switched to a 2-1 full-court press in an effort to steal some momentum, and it worked. The Stallions would get, as Delta

Grantsville sophomore for-

Celebrating America's Love of Food
A Loud Day at the Library

Dozens of Tooele County youth rang in the New Year a bit early at the Tooele Library on Dec. 31, using handmade noisemakers to celebrate the beginning of 2015. When the clock struck noon—a concession to an early bedtime for many of the participants—the kids celebrated by making a spectacular racket with the noisemakers they had been making throughout the morning. It was a rare opportunity to break the traditional silence of the library.

Many of the kids also donned celebratory New Year’s hats to mark the occasion.

Grace Potter (left) shows off her noisemaker, made with rice and beans. Sisters Alexis and Amanda Stromberg (middle) celebrate the New Year at the strike of noon on Dec. 31.
Pennsylvania woman gets taste of fame as slow cooking guru

Lisa Kozich of Canonsburg is the creator of CrockMoms.com, a website and Facebook page dedicated to connecting mothers from around the world. The site has been gaining in popularity and now features the recipes of mothers from around the world, as well as resources for finding other mothers to connect with. Kozich started the site several years ago when she created a separate site and Facebook page for mothers in her hometown of Johnstown, Pennsylvania. The site quickly grew to connect mothers from around the world, with the goal of sharing recipes and connecting with others. Today, the site features the recipes of mothers from around the world, as well as resources for finding other mothers to connect with. Kozich is proud of the success of the site and the impact it has had on mothers around the world. She started the site to connect with other mothers, and it has since grown to reach millions of people. The site now features the recipes of mothers from around the world, as well as resources for finding other mothers to connect with. Kozich is proud of the success of the site and the impact it has had on mothers around the world. She started the site to connect with other mothers, and it has since grown to reach millions of people. The site now features the recipes of mothers from around the world, as well as resources for finding other mothers to connect with.

Kozich, who works as a teacher in several Pittsburgh area schools, is finding frequent requests for radio and TV appearances. She's at for a site that provides one of the unique cooking experiences for different parts of the country. A mom in Texas might put a chocolate bar in her child's school, while a mom from Pennsylvania might use cocoa powder. Kozich said, "I can't wait to see everyone eating and enjoying dishes that are so different from the norm to mom's own. I've done a few times, and I'm looking forward to meeting other mothers."
To chill or not to chill — that is the question

by Danusha Laméris

In a poem published last year in Theátis, the Washington-based poet wrote:

Myriads of eggs will be used, and put them back in the feed. It is not advisable to use eggs from hens that have been laying eggs for a different purpose, or you can air-dry the eggs and put them back in the feed.

Once this behavior begins, it’s not as though we need to make an innominate on a refrigerator for our morning scrambled eggs! However, with so many of our food items requiring cooling, it’s not as though we need to make an innominate on a refrigerator for our morning scrambled eggs!

It's a question of whether it is better to chill or not to chill. The answer depends on the egg's age, the temperature, and the way it is being handled. For example, older eggs tend to chill faster than younger eggs, and eggs that are kept at a higher temperature will chill more slowly.

In general, eggs should be kept at a temperature of 50°F (10°C) for 24 hours before being refrigerated. This will help to slow the growth of bacteria and prevent the development of off-flavors.

When refrigerating eggs, it's important to remember that they should be stored in the coldest part of the refrigerator, away from heat sources and other foods that may absorb odors.

Finally, it's important to remember that eggs should never be heated or frozen. If they are not going to be used right away, they should be stored in the refrigerator at 40°F (4°C) or below.
**Universal Crossword**

Edited by Timothy E. Parker January 5, 2015

**AQUARIUS** (Jan. 20-Feb. 18): Keep your spirit open to new possibilities. Plenty of opportunity will be yours. You now have the support you need to reach your goal. Progress will be swift if you remain goal-oriented.★ ★ ★

S troy Connors is the assistant you want to see. Open System Preferences and then select Display. Once you are in the Display box, select the Color tab. To the right, select the Color Calibrator box and a new box will open with an introduction. Read the information and then select Continue. You are then guided through four steps used to determine your display’s native lumiance response curves. Do not select the box “Expert Mode” at this time.

In the next five steps, you may choose to allow other users on your Mac to use your own profile. Once you have your preference set and then select Continue. This time, click the box “Expert Mode” and then select Continue.

In the next five steps, you will adjust the left slider until the grayscale shape in the middle, matches your color selection. Then, move the right slider until you see the colors more accurate. It is very important to make sure the colors are accurate. Your color selection will be used as a reference when you are finished and then select Continue. You are then guided through five personal steps to adjust your display. Select Done to close the windows.

10. What two gloves were taken from the Chicago White Sox’s Grant Park statue? (Black Gold and Silver)
DIRECTOR OF ENGINEERING

Stansbury Park Improvement District

DISTRICT ENGINEER

Stansbury Park Improvement District

This position is responsible for the engineering department and the implementation and planning for future development projects. Directs, supervises, and coordinates all engineering activities to ensure that the projects are completed on time and within budget, while adhering to the guidelines of the plans and specifications. The Engineering Department is responsible for the planning, design, construction, and maintenance of all public facilities, including streets, parks, trails, and other community facilities. The position requires a strong knowledge of engineering principles, project management, and budgeting.

REQUIREMENTS/EDUCATION

Bachelor’s degree in Civil Engineering and a class B contractors license from the State of Utah.

PROFESSIONAL EXPERIENCE:

Minimum of 5 years of related experience in engineering or construction management, with at least 2 years in a supervisory role.

SKILLS AND ABILITIES:

- Ability to lead and manage diverse teams
- Strong technical and problem-solving skills
- Strong communication and interpersonal skills
- Strong organizational and project management skills
- Ability to work under pressure
- Experience in budgeting and financial planning

The ideal candidate will have a proven track record of success in a similar role, with a strong understanding of engineering and construction principles. They should be able to work independently and in a team setting, with a strong focus on delivering high-quality projects on time and within budget.

(Published in the Tooele Transcript Bulletin, January 6 & 13, 2015)
How Old Is Your Christmas Tree?

Each year, a tree grows a new layer of wood under its bark. By counting these layers, called rings, you can discover the age of a tree.

This year, after you take the decorations off your Christmas tree, count its rings! One ring equals one year. (The bark is not a ring.) Can you find out the age of your tree?

Standards Link:

1. Use a strip of paper 60" long to make the timeline.
2. Divide the strip into enough equal segments to show the insect plagues and times of volcanic eruptions.
3. Find a newspaper article that interests you. Write the headline, lead sentence and date of the article in the first segment.
4. Follow the newspaper for more stories about this news item.

Reading Rings Tells Past

By reading the rings of trees, dendrochronologists can read the story of our planet, stories that reside in living trees and in logs used to build ancient buildings. Tree rings have told of weather patterns that lead to severe fires. They have revealed century-long droughts, insect plagues and times of volcanic eruptions.

By reading the rings of trees, dendrochronologists can read the story of the climate of different years. Look at the tree trunk pictured above. Some of the rings are wide and some of them are thin. A wide ring tells us that this was a good year for growing. There was the right amount of water and sunlight. Drought causes slower growth and narrow rings. Dark spots tell us that the tree survived a fire that year.

Extra! Extra!

Make a list of 18 words from the newspaper that have double vowels. Circle the vowels. Underline the vowel whose sound you hear when you say the word.

Look Inside

Use the core samples to complete the chart below.

Tree Ring Maze

Find the words in the puzzle, then in this week’s Kid Scoop stories and activities.

What’s that? Well, a dendrochronologist is an expert who studies the rings of trees. My name is Dr. Cypress Sapping, I’m a dendrochronologist! What’s that? Well, a dendrochronologist is a scientist who studies the rings of trees.

Look at the tree trunk pictured above. Some of the rings are wide and some of them are thin. A wide ring tells us that this was a good year for growing. There was the right amount of water and sunlight. Drought causes slower growth and narrow rings. Dark spots tell us that the tree survived a fire that year.
