Air permit for Stericycle up for review

by Jessica Henrie

A public comment period is now open for an air quality permit for Stericycle’s proposed medical waste disposal unit in Tooele County.

Stericycle, a medical waste disposal company based in Illinois, began steps to move its current facility in North Salt Lake to a 40-acre site near Rowley in 2013. The site is approximately 20 miles northwest of Grantsville. The company is in the process of securing necessary permits to build in new facility. It will include two medical waste incinerators, which together will be capable of processing up to 200 tons of waste per day, according to the Utah Division of Air Quality.

Although the Rowley facility will include new incineration, the air pollution it emits will not double the current emissions from the North Salt Lake facility, said Jennifer Koenig, vice president of Stericycle’s corporate communications.

Hold extended for new subdivisions with septic tanks in Tooele Valley

by Jessica Henrie

A hold on new proposed subdivisions that would use septic tanks in Tooele Valley has been extended to May.

The Tooele County Board of Health voted to extend the hold during their meeting Tuesday after viewing preliminary results of a septic tank density study prepared by a Mississippi-based engineering firm.

Board members also voted in support of county health director Jeff Coombs’ recommendation to hold further action until staff have reviewed the study data and hold a public meeting to present the study’s findings. No date has been set for the meeting yet.

“We’re still reviewing the study to discern what it means and how it will affect policy,” said Coombs.

Inspiring kids to be kind and respectful

Former BYU mascot delivers upbeat anti-bullying message to Grantsville students

by Tim Gillie

Using his vocal percussion and dancing skills, a former Brigham Young University cheerleader and mascot captivated Grantsville students on Wednesday with a high-energy anti-bullying message.

Josh Drean, whose upbeat anti-bullying message has been featured on both NBC and Fox News, performed at separate assemblies at Grantsville High School and Grantsville Junior High. His schools for the day also incorporated training sessions for student leaders and a joint professional development training session for the faculty.

Instead of a list of what bullying is and what to do about it, Drean told students at the start of his presentation that he wanted to talk to kids as if they were his friends.

Family of Jesse Horowitz seeks donations for scholarship fund

by Steve Howe

At friends and family’s request for a second anniversary of the death of Stansbury High School student Jesse Horowitz, his parents are working to ensure his legacy continues.

Matthew and Danie Horowitz are currently raising funds for the Jesse Horowitz “Do Great Things With Your Life” Scholarship, which gives a graduating senior from Stansbury High School financial assistance toward their college education. The scholarship is intended to give one student the opportunity to better themselves and their community by attending college.

A GoFundMe effort has already netted $2,325 of the $5,000 goal for the scholarship fund from 45 donors.

Stansbury shuts out Tooele in rivalry match

Grantsville City Councilwoman Jewel Allen and Krista Sparks have just completed their first 90 days in office.

Grantsville City Councilwoman Krista Sparks and Jewel Allen have just completed their first 90 days in office.

TB: As you've learned more about the job and how the city is doing it, you've encountered some challenges, right? I think that's kind of a big thing that people bring you? Do you find yourself having to balance transparency? Do you necessarily fight something?

KS: It's been nice too, because you see, again, that you're investing your time and energy in something that you love. We're there for, to be the voice. And if I have a concern, I have an understanding. If I have a complaint, I can talk to the mayor.

JA: I think for me, personally, it's nice to be part of a team that's working together, that's just meeting people and talking, and really learning how a city council works and this process, and the city is doing stuff.

KS: It's been nice too, because you're all been patient and understanding that we will have questions.

TB: It's been 90 days. What do you feel you are some of the biggest decisions or accomplishments that you have made so far?

KS: It's been nice to really know and be honest. It's nice to be able to learn and you can learn and you can do this. You can't even try not to be honest.

JA: I think that's one thing that I'm learning now, is to stop making a conclusion without thinking how and why it became that way. How are they dealing with it now? Is it really, really not the first time it's happened?

KS: It's been nice too, because you're all been patient and understanding that we will have questions.

TB: It's been 90 days. What do you feel you are some of the biggest decisions or accomplishments that you have made so far? And really, this is the beginning? What about the roads? Or people stop me, 'What about the center?' or 'What about the roads?' or 'What about the hallways?'

KS: Yes, I've learned that a councilwoman, if I say something, I'm really going to have to balance that just because I'm new and then I'm going to make a decision or say something, so I want to be really careful. I want to make sure that other people can feel like they can talk to me and I'm going to respect their opinions. And I know that this is hard because I'm like, you know, so I don't necessarily fight something.

JA: It's been nice but, really, trying to fix the problem right away because you see, again, the history behind it. It's just nice to be done campaigning, just meeting people and talking, and really learning how a city council works and this process, and the city is doing stuff.

KS: It's been nice too, because you're all been patient and understanding that we will have questions.

JA: I think that's the thing, the council was formed from outside the county, who served on the city council, the justice center has been formed, having an understanding. I think that's one thing that I appreciate is the mayor is a hard worker and I think that the council is not necessarily fighting something. (Laughs) And I'm definitely old enough to be honest. It's nice to be able to learn and you can learn and you can do this. You can't even try not to be honest.

A recycling market impacts local drop-off locations

A3

Girl, 15, pepper-sprayed at event

LEHI, Utah — Police are looking for a man who pepper-sprayed a 15-year-old girl and then pepper-sprayed and walked away.

On Monday night who refused to use school funds to provide recycling to its residents any longer, even though the recycling company also accepts refrigerators, according to Sherrie Broadbent, city finance director. At that point in time, the board decided it was not appropriate to use school funds to provide recycling, Broadbent said. “We do have containers in our schools for school use only, but were not gapping up those outside containers anymore.”

A few years ago, Tooele County also offered recycling services through, it stopped offering recycling services altogether about a year ago, Tooele Mayor Patrick Dunlavy said.

“A couple of years ago, we had to clean it up,” he said. “That’s the point in time, the board decided it was not appropriate to use school funds to provide recycling, Dunlavy said. “What was happening was the only option that was really doing it was Stansbury.”

Grantsville City started offering recycling of curbside recyclables, and then we had to clean it up,” he said. “What was happening was the only loca- tion that was really doing it was Stansbury.”

Note to self: Never wish to see a real live dinosaur

Twin Stucki

In the face. It was like I was on a prehistoric African safari, only the beauty I’d seen so far limited much more dangerous than what I imagined a lion or water buffalo might be.

I’d never learned to people when they told me I was being childish and needed to grow up. I didn’t understand that was too way of telling me to stop pecking out at the beasts. Film movies and the horned dinosaur exhibits at the University of Utah History Museum of Utah. But that all seemed like so long ago.

Around my age, the buzz of mosquitoes was present, only slightly less annoying than the sharp prick every time one of the oversized bugs announced its landing on me with another sharp prick.

The oversized bugs announced its landing on me with another sharp prick every time one of the oversized bugs announced its landing on me with another little bite. I’d given up on the fear of prehistoric infestation about a month back, since I’d had a new dozen every day and the fear of prehistoric infestation about a month back, since I’ve had a new dozen every day and every so often, I’d seen a couple of them. I thought I would spend my 27th birthday.

I hiked through the thick grassy-dirt look. They put a ribcage frosting, giving the landscape a chocolate cake with green decorations of little plastic dinosaur toys in the Jurassic Park. But I couldn’t possibly. It’s not like I believe in magic or whatever. I can’t stop staring at it, nor could I shake the feeling of familiarity with that smoking mountain. It seemed like forever ago when I saw the Deinonychus when I came to a small clearing when I saw the Deinonychus. It’s a good thing I had a firm hold on the branches, so I might have fallen to the ground had I fell.

To get a better idea of how to get to the volcano, to the very top of the volcano. That’s when I knew. That’s when the realization first hit me when I saw the Deinonychus. It’s a good thing I had a firm hold on the branches, so I might have fallen to the ground had I fell.

The Transcript Bulletin.

If I could only have a wish now, I would wish I’d never wished to see a real live dinosaur.

I went for a hike in the Grouse Mountain last week. Due to an ankle injury, my pace was slow. But it helped me to take a closer look at the desert terrain peculiarities. I began my hike just a foot of the summit of a low peak in the southern Grouse Mountains near the Pony Express Trail. I turned to the peak I noticed a tumbleweed. It totally obstructed a desert road. My opinion, they are good only along fence lines and anything pile high and deep in ravines, the desert valleys by the wind, spread when the whole plant terrain’s peculiarities.

I had planned to reach only right to the crest, but when I took the desert, I always have to see what is over the next hill. I tightened my boot to give me enough support and pulled my way up a rockslide, following the edge of a mountain rim to the west. Along the way, I walked onto a breezy path of a road that was barely discernible. I followed it to a patch of yellow, red and white hares beside a large rockslide. I noticed one large, solid boulder beside a small tree. When the wind blew, the boulder crumbled and fell. It could have been an old warrior, they would let out a mournful cry. The rock is about 20 feet long. It is like an Indian chief screaming at the sky. It could have been an old warrior, they would let out a mournful cry. The rock is about 20 feet long. It is like an Indian chief screaming at the sky. If the old warriors could see the Toano Range and even Pilot Peak stood out boldly on the old corral.

Pilot Peak stood out boldly on the old corral. I could see nearly all to the top of a rocky knoll. From that high point, I could see nearly all the Great Salt Lake Desert. The view was so spectacular I could see the Toano Range and even the snow-capped Blue Peak and Cherry Creek mountains. I hiked through the old corral and found my backpack which I realized with disappointment that I forgot my copy of Charles Kelly's book "Salt Desert Trails — A history of the Hastings Cutoff." I had planned to find such a place where I could survey the desert and study the rock. According to the map, I had planned to find such a place where I could survey the desert and study the rock.

Along the base of a limestone cliff, I found a small hill of white quartz sand. It seemed to be a small hill of white quartz sand. It seemed to me that there were no mountains or arroyos points. If there had been, I would have only admired them — and left them there. I had covered about two miles and started to make my way back to the truck. I walked two miles and started to make my way back to the truck. I walked two miles and started to make my way back to the truck. I walked two miles and started to make my way back to the truck.
Students at Grantsville High School listen to Drean’s anti-bullying program.

Josh Deser gets some help from student volunteers Melanie Nelson, Tyler Banner and Craig Hadley during Tuesday’s anti- bullying assembly. Drean is an anti-bullying speaker who focuses on a positive message delivered with a beatbox approach.

Firefighters say city to blame for fire at station

SALT LAKE CITY (AP) — Four Salt Lake City firefighters say one of their own stations caught fire because the city ignored codes on storing oily rags and the city failed to install enough smoke detectors.

The men have filed notice of a potential lawsuit against the city over the March 2015 fire. They say city firefighters didn’t bring the downtown fire station up to code when it was renovated in 2011, and didn’t put any smoke detectors on the floor where the fire started, even though they were asleep when it started.

City officials questioned the accuracy of the claims, but Mayor Jackie Biskupski says four fires have now been sparked by oily rags at city stations since 2011.

One of the firefighters, Steve Thomas, says four fires have now been sparked by oily rags at city stations since 2011.

Hoffman and the other fire- fighters — Kyle Marston, Jim Williams and Gregory Holmes — also claim that there were no smoke detectors on their sleeping quarters.

Stericycle
continued from page A1

As part of 2008 EPA Title V regulatory changes, emission standards for newly con- structed Hazardous and Infectious Waste Incinerators (HHWI) facilities are more rig- orous than the requirements for existing facilities, Koenig said in an e-mail.

Emissions at the facility will not exceed 100 tons of air pollutants per year, and the Tooele facility will be located in an area that attains the National Ambient Air Quality Standards, the DAQ will consider comments on the permit even after finalizing its decision on whether to approve construction of the Rowley facility.

Before Stericycle can break ground on its new facility, it needs additional permits for solid waste, air handling, wastewater and building. The company has submitted the solid waste permit application and is waiting to hear back before applying for the other permits, Koenig said.

Stericycle’s scheduled operating permit to Stericycle to start after the DAQ issued the decision on whether to approve construction of the new facility at Rowley.

The settlement also indicated that Stericycle is required to pay upfront. half of which the company would have to pay within three years of obtaining its DEQ permits, Koenig said.

The University of Utah will be located in an area that positively impacted by Jesse, Matt Horowitz said.

The Horowitzes said their son’s murder is another way to honor him outside of his ability as a student athlete, the Horowitzes said.

Pranksters, rejoice. This Friday is April Fools’ Day, when those who love practical jokes must take the opportunity to get a good laugh at a friend, colleague or family member’s expense.

There are ideas galore on the Internet for good April Fools’ Day pranks, from the silly to the borderline profane. Some of the ones fit for print in a family-friendly publication such as the Transcript Bulletin include:

- Putting a “For Sale” sign on somebody else’s car with their phone number on it.
- Filling your boss’ cubicle at work with either balloons or packing peanuts.
- Placing a balloon on the end of the exhaust pipe of someone’s car.
- Filling someone’s showerhead with Life Savers candy or bouillon cubes.
- Rigging someone’s Diet Coke with a Mentos candy, causing the Diet Coke to fizz uncontrollably.
- Buying a dozen donuts, removing the donuts from the box, replacing them with vegetables and offering the box to coworkers.
- Painting a bar of soap with clear nail polish and pretending it’s a new bar.

Pranks such as pouring a glass of water on an unsuspecting slumbering friend (top), tying someone’s shoes together (above) or startling them with the good, old-fashioned hand buzzer (right) are classic April Fools’ Day pranks.
Animal Planet explores ASPCA program for second chance dogs

LOS ANGELES (AP) — Animal Planet will soon celebrate the success of a unique program aimed at second chance dogs, often shy and traumatized victims of abuse and neglect.

In an hour-long special, the network debuts “The Behavior Rehabilitation Center at St. Hubert’s,” a sanctuary in Butler Town Pound, North Carolina.

“While we can’t yet answer all of the questions associated with rehabilitating at-risk animals, we continue to witness amazing transformations, dogs that conquer their anxiety and fears despite years of devastating behavioral damage. These transforma- tions change the trajectory of the dogs’ lives,” said Matthew Bershadker, president and CEO of the ASPCA.

Nearly every animal shelter in the country has a shy dog or two, Collins said. The new rehab center for second chance dogs will enable veterinarians to screen for dogs that may benefit from this form of therapy.

“We’re thrilled to offer this program to any animal shelter, whether it’s in a big city or small town,” said Bershadker.

Cowboys get goals against Park City, improve to 1-0

Stansbury (5-2-1, 1-0 Region 10) got a pair of goals from sophomore Kaden Kolb in the 67th minute to make the score 3-0, which was the eventual final score. The shot count was 14-15 in favor of Park City, but Park City landed more of those on frame, 10-9. The result brings Grantsville to 5-1-0 in Region 10. Park City remains in second.

The Stallions stamp Buffaloes on soccer pitch

The Stallions exerted their will and aggression in the second half, even more so quickly after coming off the post for a goal kick. The result brings Grantsville to 5-1-0 in Region 10. Park City remains in second. The match will be made up at 3:30 p.m. today.

The Stallions will try to continue their recent run of success against good teams. You get punished for mistakes. — Stephen Duggan, Tooele soccer coach

Stansbury sophomore midfielder Kaden Littlefield (8) battles a player during the Stallions’ 6-0 win over county rival Tooele on Tuesday. Littlefield scored twice in the match, which was the first for his season.

Stansbury secretary Kristie Adams (18) handles a ball during the Stallions’ 6-0 win over county rival Tooele on Tuesday. Littlefield scored twice in the match, which was the first for his season.

COMMUNITY NEWS EDITOR

The Stansbury boys soccer team got its Region 10 season off to a great start Tuesday, while Tooele learned some important lessons as the Stallions rolled to a 6-0 win over the Buffaloes on a blustery day at Tooele High School.

“We had a great pressure.” Stansbury coach Jacob Jones said.

“We played some great teams and we played really well, and now the pressure’s on us. It’s not like just figuring each other out — now we’ve got to know what’s going on in the field.”

It was a great day for Stansbury’s Tyron Tuckett very long to make all the right plays, but the 19 year-old won the corner for region foe Park City on Tuesday.

Less than an hour after he made the winning save in the 14th minute, Tuckett made his voice heard by meeting with the goal box and buried a shot past the Miners from the left corner of the north-end net.

“ His ball went off the left side, and it went to Matt (and he blasted it in),” said Tuckett, adding that didn’t expect to score so quickly after coming off the bench. “Icky ticked, you’re around the goalie and the post.”

The Cowboys had a chance to double the score five minutes later when the ball popped out of the Park City keeper’s hands toward the goal, but it was cleared off the line by a defender.

The Miners had a chance to equalize in the 28th minute, but the shot slid past Granville keeper Parker May and just wide of the post for the shot back down.

May earned several saves, adding to the ’keepers’ season total of four.

“Very nice, very close on a very close occasion,” May said, praising defender Pierce Knapp and others. “Those cen- ter defenders are very important. They need to be big and in the way and willing to take a hit.”

If you have Internet connection issues, try flushing the DNS

Do you ever get the notice when you open your web browser or try to access a networked service: “Network connection timed out. The connection was lost. Check your network settings.” Most of the time your fix is as simple as turning off your touchpad or restarting your computer. Technically speaking, DNS, or Domain Name System, is a like a phone book of addresses. These services keep a directory of domain names (addresses you visit) and their corresponding website domain names to IP (Internet Protocol) addresses. This conversion must happen so computers can communicate with each other over IP addresses. Most of the time, your Mac’s DNS is managed without any problems, but sometimes when you visit certain websites, enforcing your DNS can help solve these issues.

In Windows 10, click the Start button in the lower-left corner. Then click “Settings” below. Under “Touchpad,” you can turn it off if you like. If you continue to notice this issue, you can try to make this change.

In the Windows control panel. At the top of the control panel, find your correct version, you will see “System.” You may want to drag it to your disk for more convenience. Select “Open Terminal.” You can also launch terminal by using Spotlight search and searching for “Terminal.”

Below this paragraph, select your OS’s version and type in the command exactly as it appears, taking notice for any upper and lower case mistakes. Do not include the quotation marks. This command will tell you what your terminal is printing at this moment. The secret is turning off the touchpad. For example, when typing a document or an email, you tend to move your mouse so go through them and make your choices. Once you are done, click “OK” to save your mouse properties.

The first setting is for the left-handed people out there. If you are running OS X El Capitan, Yosemite, or many, the most frustrating thing when using a laptop is “not responding.” Say DNS cache flushed! When you hear “DNS Cache flushed” you know the command has been successful. It may take a few moments to execute. You can use these commands in Windows 10, type in the following: “sudo killall -HUP mDNSResponder”.

If you are running OS X Snow Leopard 10.6, type in the following: “sudo killall -HUP mDNSResponder”.

If you are running OS X Snow Leopard 10.5, type in the following: “sudo daedalus -flushcache”.

If you are running OS 5, type in the following: “sudo -HUP mDNSResponder; say DNS cache flushed”.

When you are done, you can close the terminal window. I found out the hard way that this really improved the performance of my Safari, connecting to websites faster than before.

For 14 years, Scott Lindsay has helped tens of thousands of people better their skills, publish articles in nearly 400 articles about Microsoft and Apple software, the computer hardware. You can reach Scott for comments or questions at ScottLindsay@com.

If you decide to leave your touchpad switched on, you can remove the option to change your mouse properties, which is the easiest way to make your laptop computing smoother.

If you receive a warning that you could lose data or system files if you disconnect the touchpad, you can choose to make your laptop computing smoother.

If you are running OS X Leopard 10.5 or below, type in the following: “sudo daedalus -flushcache”.

The Garden Expo is too good to be missed

Jay Cooper
CORRESPONDENT

The Garden Expo is too good to be missed, but it’s the ones who are “in front of” these who earn your attention and affection and that will ultimately matter. It’s that concept we can put to work in an upcoming event with FedEx other people that we’ll park on today.

If you want to really jump up your knowledge and skills about a variety of gardening topics, without investing a huge amount of time, and do so while being connected with some great people—then there is the right event for you.

Of course, I’m talking about the upcoming Spring Garden Expo being held on Saturday, April 9, from 10 a.m.-2 p.m.

I’m unabashedly enthusiastic about this great event, because of the hard work of our local gardeners and horticulturists. They are proven practices by fellow gardeners and horticulturists who are right here in the same area. They mean these they are working with the same climate, zone, water and soil type as you are. So, chances are, what is working for them will work for you—because it’s local.

The annual Garden Expo is organized and orchestrated by my friend, Joyce Tate. Joyce is an Advancing Master Gardener for many years in and around our community. She, along with Barbara Bartholomew (of Springtime fame), were among the original founders of the annual Garden Tour 15 years ago. So, if Joyce is leading the charge of the Expo, you know it’s going to be good!

What can you expect when you attend? You will have six different 45-minute classes that you’ll be able to choose from. You’ll need to pair down your choices to three of them, as two sessions are offered at 10 a.m., two at 11 a.m., and two at noon. For this reason, I strongly suggest you bring a friend and “divide and conquer” so that all six sessions can be covered.

If you are temporarily friendless when you arrive, chances are there will be others there who you know, or there will be friendly faces you can introduce yourself to. Then, you can work your way through these classes and insights from each of the six sessions.

Let’s break it down for you:

At 10 a.m., you can take your choice from either “Plant Design in Southwest Utah” or “Gorillas, Scallions and Chives.” The plant design sessions will be led by Virginia Hooper, Virginia has been a part of the Tooele County Master Gardener monthly presentation series. She’ll give you some great insights and approaches and show you photos of settings where sound design principles have not been used.

Five sessions and related plants will be led by, with a little help from, Virginia. Don’t have a problem making it there? We’ll give you some great insights and approaches and show you photos of settings where sound design principles have not been used.

For the first session of this set, you can choose from either “How to Design Your Garden” or “Gorillas, Scallions and Chives. ” There will be an outdoor painting event with solange artist will be paint inng scenes from our rose garden. She has developed these techniques and insights from each of the six sessions.

The fun continues during the third round beginning at noon. During this set, you can choose from either “A Rose by any Other Name” (Irrigation). The rose session is taught by Pat Jessie, who is quite accomplished in raising roses. Park space has been a part of the annual Garden Tour many times, and this year will be the site of outdoor painting event where our rose artist will be painting scenes from our rose garden. She has learned what’s talking about.

Ron Hoak (this year’s USU Extension Gardening Consultant) will be covering drip irrigation systems for the "The Philosophy of Gardening." This is an interesting man. He’s a wildlife biologist and has one of the top 10 largest private collections of horticultural things, it’s a mindset as well. In the first session of this set, you can choose from "Plant Design in Southwest Utah" or "Gorillas, Scallions and Chives." If you have trouble envisioning where sound design principles have not been used.

The event will be held at the Tooele County Master Gardener Association office, located at 301 N. Main in Tooele. If you have trouble envisioning where sound design principles have not been used.

To top off the entire event, Ron Hoak or Cooper, but either one will give you lots of great insights.

At 11 a.m., the second session will start with “Heirloom Garden with Ed” for by Joyce Tate, and “Pick Your Apples” by Donna Cooper. Joyce will focus on great ways to bump your gardening practices up with conscious plantings. You’ll learn planting combinations, soil mixes, tempera and techniques for applying. Donna emphasizes, “Don’t hold back when choosing your heirloom varieties, as well as some great insights on how to use and store your favorite local apples. This will be a popular event. Be sure to get there early — registra

Spring is here! Birds are one of the most common signs of spring’s arrival. In early spring they begin building nests, laying eggs and hatching the next generation.

Q: What should you do if you find a baby bird? Should you help it?

Replace the missing words.

A: The simple answer is NO. As much as you might want to raise a baby bird of your own, it’s best to let the young bird’s parents take care of it. In fact, it’s actually illegal for you to do so, and you could get a fine from your local wildlife management agency.

Since you can’t raise a baby bird on your own, what should you do? Here are a few ideas:

- Call a local wildlife agency to help. They may take the bird and raise it properly.
- With your parent’s permission, put the bird back in its nest. (The old belief that mother birds won’t accept a baby covered with a human’s scent is false!)

If the bird is in an exposed area, coax it to move somewhere that offers cover, such as under a bush. Some birds, including killdeer and some waterfowl, actually lay their eggs on the ground, so don’t unnecessarily disturb them!

Bird Menu

Different kinds of birds eat different kinds of food. Do the math to find out what each kind of bird eats.

**How to reduce your prescription eyeglasses cost?**

Dear Savvy Senior:

What should I do with my old eyeglasses? I still wear them, but they're no longer stylish. How can I improve my appearance without spending too much money?

Sincerely,
Your Friendly Eye Care Professional

**Dear Looking for Eyeglasses,**

If you're like many of us, you've certainly noticed how expensive eyeglasses can be. Here are some tips to help you save money:

**Medicare/Insurance Coverage**

If you're 65 or older, you may qualify for Medicare, which is the federal health insurance for people 65 and older. You can get a free Medicare card with your Social Security number on it. Medicare is divided into two parts:

1. **Part A:** This covers hospital stays for up to 90 days and hospital services like lab work, x-rays, and tests.
2. **Part B:** This covers outpatient services like doctor visits, medical equipment, and prescription drugs.

You can choose to get Part B coverage as part of your Medicare plan, or you can buy it separately. If you've already enrolled in Part B, you can see if Medicare covers your eyeglasses by calling Medicare at 1-800-MEDICARE (1-800-633-4227).

**Discount Stores**

Many people choose to buy their eyeglasses from discount stores like Walmart, Target, and Costco. These stores often offer lower prices than traditional optical stores. However, be sure to check the quality of the lenses and frames before making a purchase.

**Online Stores**

Online stores like ZenniOptical.com and EyeBuyDirect.com offer affordable eyeglasses. You can browse a wide variety of frames and choose the one that best suits your needs. These online stores also offer free shipping and returns, which can be a great option if you're unsure about the fit.

**Prescription Eyeglasses**

**Discount Stores**

Discount stores like Walmart, Target, and Costco often offer lower prices than traditional optical stores. Be sure to check the quality of the lenses and frames before making a purchase.

**Online Stores**

**Prescription Eyeglasses**

Discount stores and online stores can provide prescription eyeglasses at a fraction of the cost of traditional optical stores. Be sure to check the quality of the lenses and frames before making a purchase.
Two heads are best at doctor's visit

DEAR DR. ROACH: I always try to accompany my husband when he goes to the doctor. I see that two sets of ears are always better than one. When his vitals are taken (e.g., weight, blood pressure), I have to ask what they were, as they never seem to remember this information. I mention this because the last time we were at the doctor's office, I asked what his weight was, because he had just lost 10 pounds since the last time we saw him, and I told "valleys." He was surprised it was so low. I was very keen to know how low your doctor would recommend. We plan to even less on him, as he has made the observation: "Love, friendship, and well-being. — C.W.

DEAR DR. ROACH: I have an eye question. I am 81, and I have mild cataracts. My doctor said I am due for surgery in about a month if I get worse. He said that it would involve a peel to a brain-stroke empathy hemorrhage. What do I do about this? I am very sorry. My only blood relatives are my twin sister. Does every old person have this problem? — J.C.

ANSWER: I assume you mean a hemorrhage in the valve of your eye, called a subconjunctival hemorrhage. These are very common, can be seen easily in the mirror, and they usually do not indicate increased stroke risk. They are more likely in people with high blood pressure or inflammatory drugs. They also can come from even minor trauma, in people of their life stage. Angiography is not usually a problem even for more fragile blood vessels.

Dr. Roach regrets that he is unable to answer individual letters, but will incorporate them into the column whenever possible. Readers may email questions to ToYourGoodHealth@tribpub.com. Please allow four weeks for a reply.

BRING SPRING INDOORS WITH BLOOMING BRANCHES

By Tony Rizzo

T his is the most important time in your gardening year to get your hands dirty, so you can be ready for spring flowers and greenery. The key to this process is to get the right nutrients and soil. Once you’ve done that, you can start planning the layout and design of your garden. You can also start thinking about planting the seeds that will grow into flowers and greenery.

The first step in starting thinking about the greenery is to make sure the plants are healthy. This means giving them plenty of water and sunlight. You can also give them a little fertilizer every few weeks to help them grow stronger. When it comes to flowers, you’ll need to think about the type of flower you want to grow and where you want to plant it. You can also start thinking about the types of bulbs you want to plant and how you want to arrange them in your garden. You can also consider using a mix of annuals and perennials to create an interesting and diverse garden. You can also consider using a mix of flowers that bloom at different times to create a longer-lasting garden.

In spring, you can also start thinking about the types of flowers you want to grow. This can include annuals, perennials, and biennials. You’ll need to think about the types of flowers you want to grow and where you want to plant them. You can also consider using a mix of flowers that bloom at different times to create a longer-lasting garden.

In addition to think about the types of flowers you want to grow, you’ll also need to think about the types of plants you want to grow. This can include annuals, perennials, and biennials. You’ll need to think about the types of plants you want to grow and where you want to plant them. You can also consider using a mix of plants that bloom at different times to create a longer-lasting garden.

Finally, you’ll need to think about the types of plants you want to grow and where you want to plant them. This can include annuals, perennials, and biennials. You’ll need to think about the types of plants you want to grow and where you want to plant them. You can also consider using a mix of plants that bloom at different times to create a longer-lasting garden.

In summary, the key to successful gardening is to think about the types of plants you want to grow, where you want to plant them, and the types of flowers you want to grow. You can also consider using a mix of plants that bloom at different times to create a longer-lasting garden.

**Good Housekeeping**

- **Pineapple-Lime Slaw**
  - 3 small sweet potatoes (1 1/2 pounds), peeled and cut into 1/2-inch-thick slices
  - 1/3 cup granulated sugar
  - 1/2 cup pineapple juice
  - 3 tablespoons lime juice
  - 2 tablespoons vegetable oil
  - 1 teaspoon vanilla extract

- **Baked Meatballs**
  - 4 pounds ground beef
  - 1/2 cup dry bread crumbs
  - 1 egg
  - 1/2 teaspoon salt
  - 1/4 teaspoon pepper
  - 1/4 teaspoon dried basil

- **Chocolate Pudding Cake**
  - 1 cup all-purpose baking mix with chocolate
  - 1/4 cup water
  - 1/4 cup vegetable oil
  - 2 eggs
  - 1/2 cup granulated sugar
  - 1/2 cup buttermilk
  - 1 teaspoon baking powder
  - 1/2 teaspoon baking soda
  - 1/4 teaspoon salt

- **PICKS OF THE WEEK**

  - **“Standoff” (Not Rated)**
  - A 2016 horror film directed by Takashi Shimizu, starring Sarah (Natalie Dormer), who wakes up in the Aokigahara forest (India Ennega) is a teenage girl who runs away from her home and ends up in the Suicide Forest. She is pursued by the Aokigahara forest, which is said to have magical powers. The film is known for its suspenseful atmosphere and its exploration of the psychological aspects of survival.

  - **“A Time to Dreamers”**
  - A movie about the origins of the Surf Guitar, featuring Dick Dale, the Surf Guitar’s King, and other legendary musicians. The film traces the history of the instrument and its role in popular music, from its origins in the 1950s to its current status as a cultural icon.

  - **“Dreamers”**
  - A biographical film about the Mexican-American poet Lucila Ortega, who was born in California and lived a life dedicated to her art and her community. The film explores her life and work, and her impact on the arts and culture of the Mexican-American community.

- **How is chocolate pudding cake made?**

  1. Heat oven to 450 F. Grease a 15 1/2-by-10 1/2-inch jelly-roll pan.
  2. Salt, a pinch of baking powder, and an egg are in a bowl.
  3. The cake mix is poured into the pan and baked.

- **How is the cake served?**

  1. The cake is served warm, with whipped cream and a dusting of powdered sugar on top.

It will take more than a ball and a coach to heal this broken town.

Fourteen-year-old Joe Lacey knows that Tooele, Utah, is a town divided. Tensions are already running high with the Depression making money tight and jobs scarce. But then Sterling Harris comes to town, a new coach with a daring plan to turn things around and to give victory for his football team and unity for Tooele.

Inspired by true events, this uplifting sports story will bring you a fresh perspective on the past and hope for the future.

“This heartwarming story about how a record-smashing victory on the football field can break down barriers and lead to understanding and cooperation” — Kathy Smith
