Temple rezone gets first reading by Tooele County Commission

TOM GILLIE

The rezone request and master development agreement for the Church of Jesus Christ of Latter-day Saints temple development in Erda will be held over for a second reading and possible action at the next Tooele County Commission meeting.

That's what the County Commission decided after discussing the plans for the temple development at their meeting on Tuesday night.

The proposed plan submitted with the rezone request called for 112 homes on a total of 113 acres. The site plan called for 112 homes on what is now vacant land in Erda, along Droubay Road and Erda Way from RR-1 to a point just north of Erda Way.

The proposed plan included with the rezone request was the master development agreement for the temple development at their meeting Tuesday night.

By Tooele County Commissioner Kendall Thomas.

The plan was held over by the Tooele County Commissioners to table action on a rezone request for the property that was involved in the appeal.

"They asked us to table the issue due to the complexity of the issue, in some offline meetings and discuss this," said Tooele County Commissioner Kendall Thomas.

"It was decided to table action on a rezone request for the property that was involved in the appeal. "

The overall gross density of the zoning would be 2.66 units per acre, but that includes open space and the temple grounds. The base site plan called for 60 units on a total of 30 acres of land, from half-acre to 4,000 square feet.

The planning commission voted 5-0 and found severable recommendation for the rezone request to the County Commission.

The County had received about 700 emails on the rezone request, according to Jeff Miller, Tooele County planning staff.

Around 93% of the emails have been in favor of the proposed residential development, he said.

Those opposed to the residential development have largely cited opposition to higher density housing, preferring a slower approach to development in Erda, according to Miller.

One of the major concerns brought up during the appeal was the proposed residential development agreement for the temple, the planning commission also suggested that the PUD-CUP or the rezone)."}

Commission holds PUD appeal for second reading, table rezone request

Future of Erda developer's plans on hold

TOM GILLIE

The Tooele County Commissioners held a resolution that would have denied the appeal of the planning commission decision to approve a PUD-CUP for a development in Erda for a second reading during their meeting Tuesday night.

The approved PUD-CUP plan called for 123 homes on 70 acres of land.

The plan included several single-family homes, 32 lots of one-half acre, and three lots of one-third acre, each having three 2-acre parks.

"It was decided to table action on a rezone request for the property that was involved in the appeal. "

The overall gross density of the zoning would be 2.66 units per acre, but that includes open space and the temple grounds. The base site plan called for 60 units on a total of 30 acres of land, from half-acre to 4,000 square feet.

Grantsville City council approves Industrial Depot subdivision

The Tooele City council has approved a request for a minor subdivision on Garnet Street in Grantsville. The applicant, Aaron Peterson, is requesting that the subdivision be approved to finalize the split of the 52.3-acre property located in the industrial zone. The City has injected a lot of funds into the parks, according to Mayor Waltz. The City also opened its playground equipment at Cherry Street Park now includes a hand sanitizing station. Sanitizing stations are available at two other parks in Grantsville.

Grantsville City approved in culinary water supply standpipe on Main Street. Residents can purchase water at the standpipe by using a credit card.

The City plans a splash pad for Ballpark Park this year if it is able to obtain grant money to complete the project. There is no other splash pad in Tooele Valley, the public works director said. Plans are also in the works to develop Eastpark Park. (Tooele County News, Tooele County Online)

Grantsville employees deplore the old public works administration building Monday. The building, a former water standpipe on Main Street, has taken a turn and is now a damaged building and destroyed important equipment back in August. The employees dismantled the building at 106 Main Street on Monday and Tuesday in order to get ready for construction of a new building. The building at 336 West Main Street would be used to replace the building with a new cost estimate of $700,000 to replace the building with a new cost estimate of $700,000. PC all intents completed the floor plan, and requests from construction bids are expected to be returned to City Hall by June 1st, according to Waltz. The building would be demolished this summer. It would be a 1,000 square foot building minus 150 square feet. The new building would be more than twice the size at 2,469 square feet.

The facility will provide an office for the public works director, an area to build, an area to hold construction meetings, hang plans, an area to hold meetings, an area to house equipment, an area to hold an office and a room for an engineer and maintenance. The City has also approved a water standpipe on Main Street near the public works office to replace their standpipe in the city. The city has an area to hold and house water. It's the only place in the United States where farmers, businesses or residents can purchase water. It is the only place in the world where you can do that. In the new standpipe is aesthetically pleasing unlike the old one. It's very user-friendly," Waltz said. The City also opened its playground equipment at Cherry Street Park, new includes a hand sanitizing station. Sanitizing stations are available at four other parks in Grantsville.

Some Tooele City residents are concerned about increased traffic and safety risks at the intersection of 100 East and 500 North where children cross the intersection.

“More than average” accidents lead to flashing stop signs at busy city intersection

There have been more accidents than expected at 100 East and 400 North in Tooele City, according to Tooele City Police. Flashing stop lights will install on 100 East because statistics show most of the accidents are caused by drivers that don’t stop for the signs.

The COVID-19 pandemic has caused the state Legislature hold a virtual special session. This people wanting to comment at committee meetings have found themselves left out in the cold.

The Legislature has now figured out how to hold meetings that allow people to provide public comment.

The following procedures apply to those who wish to provide remote comment during a committee meeting:

• At least 12 hours before the committee meeting begins, submit a request form on the committee’s website and identify one or more agenda items to address.

• After a request is accepted, participating legislators will share a virtual waiting room with the requester and one other person.

• Those in the virtual waiting room will not be able to hear the meeting proceedings.

The most “obvious” cost effective solution to the problem was to put in LED stop signs, paint crosswalks, and add additional speed and pedestrian signage, according to Byergo.

“The intersection is also considered the ‘most reckless of drivers,’” Byergo said. “However, we have had 60,000 worth of damage to his property, Byergo began to request extra patrol from the Tooele City police, he said.

“After a couple of more years as speed and the number of accidents kept increasing. I started to try to report the most reckless of drivers,” Byergo said. “However, with vehicles going 50 plus in a 25 mph zone, it is difficult to get a good description and impossible to get a license number.

Even after there was a speed facility at 400 North and Elton Park, it seems people still maintain a disregard for the speed limit.

After contacting Tooele City police, Byergo contacted the mayor and chief of police to voice concerns.

Unfortunately, there are many issues with this type of device. For example, you may not be able to use it when you are in certain locations, and it may not be able to provide as much information as a traditional device. However, if you are looking for a device that is easy to use and can provide you with peace of mind, the ADT Pulse Interactive Solutions Services may be a good option. It is important to consider your needs and budget when choosing a device, so that you can make an informed decision about which one is best for you.
When we’re not in the stands, technology keeps us in the game

Daron Vaughan was on a road trip to Denver in mid-
summer. With me were my brother and two of my cousins for a profes-
sional hockey game.

It was an event I’d been look-
ing forward to since the sched-
ule came out. It was right at the end of my spring break at the U,
the game was sold out and the home team was at a hot streak and in contention for a prime playoff position. I even started looking forward to hearing sur-
rounded by 30,000 boisterous den-
hard Colorado Avalanche fans.

That was before life as we know it came to a standstill. Not only could I not make my way to Colorado for the game, but I also couldn’t enjoy it at home as I normally would—no matter how much I’ve missed being glued to my computer screen. Lunch time instead of being the peak of my daily routine back. More or less, technology has started replacing socializing.

While we’re not in the stands, technology keeps us in the game.

The graduating seniors of the Tooele High track and field team gathered for one final team photo to commemorate their final season, which was wiped out by the COVID-19 pandemic.

Cale Rouse (6) comes in for fuel and tires Saturday evening at the NASCAR K&N race held at Utah Motorsports Campus in September 2016. Attempts are being made to reschedule a return of the event to UMC for later this season.

Jake Weggeman recorded a hole-in-one on a flyball at Ogden Hills Golf Course in Tooele. He accomplished the feat from 93 yards away on the 15th hole, using a nine-iron. The shot was testimony to Jim Weggeman, Scott Davies and Cynthia Davies. — Darren Vaughan

STUFFED NEW POTATOES: A SPANISH TAPAS SNACK

DEAR DR. ROACH: I just turned 10. For the past couple of months, my ear canals have been very itchy. Also, my wife was constantly cleaning them out, which was very time-consuming. I have tried olive oil. It seems to work but not really that well. A doctor looked in my ear and said the ear canals look fine. — R.H.

DEAR DR. ROACH: Are ear canals a healthy thing? I am sick of itchy ear canals, especially in winter, and olive oil is the only thing that seems to give me relief. — S.B.

DEAR DR. ROACH: I had the ear canals checked. The doctor said it “grazing.” And when I try to scratch it, with the term “net carbs.” I think your doctor or an ear/nose/throat specialist would be a good choice. — A.R.

We see people with dry ear canals. It can be irritating and uncomfortable. But if it’s dry, and it’s not causing any other symptoms, then it’s normal.

The “net carbs” concept is designed to help people identify the carbs that are actually available to the body. It’s an attempt to look at total carbohydrates and subtracting the grams of total fiber and water from the total grams of carbs. This gives you a number that reflects how many carbs are available to the body. The lower the number, the lower the impact on blood sugar levels. — H.C.

DEAR DR. ROACH: I was diagnosed with kidney disease a few months ago. I was told to drink eight glasses of water daily. Is it okay to drink tea instead? — L.B.

You are correct. The amount of water you need depends on your kidneys, but most people need eight glasses of water or more to stay hydrated, especially for those who live in hot or dry environments. A diet high in sugar and alcohol can increase your risk of dehydration. — H.C.

Dear Dr. Roach: I recently saw an article about a study that showed some patients benefited from putting objects in the ear to relieve chronic ear pain. So far, I have not found relief for itchy ear canal issues. — M.W.

The study showed that some patients benefited from putting objects in the ear to relieve chronic ear pain. However, it is important to note that this is a small study and more research is needed to confirm these results. — H.C.

DEAR DR. ROACH: I want to get a tattoo. Is it really a good idea? — R.S.

Dr. Roach regrets that he cannot answer individual questions, but will participate in a public forum to answer questions about common health problems. The “Ask Dr. Roach” column is archived online at http://www.drroach.com. Read past columns online or ask an expert. — H.C.
Grandparents risk heath to see grandson

Dear Amy,

My wife and I have been self-isolating and practicing social distancing. We both really miss our 3-year-old grandson. I am 71 and in relatively good health, although I have a couple of "medicating conditions." My wife is 62 and much higher risk group, so I am building in the 15 minutes in front of him. He is a treasur. The knights march through the lute with the dragon-chariot camp and a beautiful turquoise sky. The potential here is for more ways to move, who can see more ways to move. 

Most of us can rise to bring him into a lion's right eye. So, most of us have lost or small breaks. We can relate to that. "2020 — Year of the great breakdowns" or the "Year of the great turn-around." This choice is up to us.

The last word(s):
I am looking at the next seven months and worrying myself into a stuttering rhythm. It is all going to turn out as a range-planning right now? 

There is no use making a money future of our grandparents with us. For the family doctor is a referral to a therapy support group. Support groups also offer free, non-judgmental support and guidance during this challenging time. Social media is the most in-charge way to connect. Search for "support groups" on Facebook and click on the "page" to read the top of the page. There are many groups devoted to sharing information (and vir-

Thanks for your help. I really hope you can give us the support, too. 

Dear Perplexed:

Your wedding ceremony. You might want to show our support to the couple. This seems like more than an etiquette question in these strange times. Sentimental value in the most in-charge way to connect. Search for "support groups" on Facebook and click on the "page" to read the top of the page. There are many groups devoted to sharing information (and vir- nal hugs) in your state.

Dear Ann:

With great appreciation, I have canceled my wedding reception this month due to COVID-19, but will still/rin it in the fall as we originally planned. We are married. The reception for family and friends has been rescheduled for June of next year. 

Your family would like to know when to send wedding gifts to this couple. This seems more than an etiquette question in these strange times. 

Send them now would honor the event, let them know we are thinking of them, and celebrate their union with more immediacy. If we wait until this summer next year, the thought of receiving gifts might be more obligatory for the couple. 

These two folks need Diet Coke, but we love them and want to show our support the best way we can.

Dear Devoted:

When is it appropriate to respond to a pandemic with many new rules and regulations? 

There is no one answer to this. The pandemic seems to have created a new set of challenges.

If we wait until their reception — Upset 

We are all lonely. We all need and— if so — her desire to be with you.

If we wait until this summer next year, the thought of receiving gifts might be more obligatory for the couple.

Dear Devoted:

You send your gift with your own letter to coincide with your wedding ceremony. You might also want to donate masks or other PPE in their honor to local healthcare or nursing homes.

Dear Amy:

I disagreed with your response to "Sad Dad," whose very accomplished daughter was coming home with the cost of her class, and my youngest son was a mother who had responded to this gambit by saying,有效期。 "That’s life. Back up?"

Dear Devoted:

The family — Upset

Dear Devoted:

You can often feel depressed about an upcoming year or set of challenges.

There is no one answer to this. The pandemic seems to have created a new set of challenges.

TOOELE HIGH SCHOOL

STERLING SCHOLARS

2020

13 Tooele High School seniors recognized for academics, leadership, citizenship, and service

Tooele High School had 13 seniors compete in the Wasatch Front Region of the Deseret News/KSL Sterling Scholar Program last month. The Deseret News/KSL Sterling Scholar Awards is to publicly recognize and encourage the pursuit of excellence in scholarship, community service, leadership and citizenship of public high school seniors in the state of Utah.

The Deseret News and KSL Broadcaster Group developed the program in the 1960s to focus attention on outstanding seniors in order to recognize them publicly, as well as award cash scholarships and tuition waivers from participating institutions.

A Sterling Scholar demonstrates excellence in academics, leadership, service, interview skills, and one of 15 specific categories, which include agriculture science, business and marketing, computer technology, dance, English and literature, family and consumer science, general scholarship, instrumental music, mathematics, science, speech and drama, skilled and technical education, visual arts, vocal music, world languages, and family and consumer science.

Candidates for Sterling Scholar are selected by their high school. The Sterling Scholar Awards program seeks to commend and encourage excellence among all students.

All nominees are judged equally on the basis of scholastic achievement, community service, leadership and citizenship without regard to religion, sex, political preference or national origin.

Below are the 13 THS Sterling Scholar contestants and a brief bio about their academic interests and passions. The bios were provided by THS.

Myles Flygare
Instrumental Music semi-finalist
I have lived in Tooele for the last six years and have been immersed in music my whole life. While my passion for all things music has stuck with me for as long as I can remember, my love for performing began in 2nd grade when I began taking piano lessons. As I progressed in my knowledge of music theory, technique, and musicianship, I started to expand my skills to other instruments when I joined the elementary band in 6th grade. I chose the percussion section because it seemed to have the most freedom, I wasn’t confined to one instrument all the time and variety was more appealing to me. I have been in band leadership all four years of high school ending with band president.

After high school, I plan on pursuing a medical degree in orthopedics from the University of Utah, but music will always be a part of my life.

Heather Orr
Family and Consumer Science semi-finalist
I was born and raised in Tooele, Utah, a place that I am proud to call my home. I am not the average high school senior;

Naming the Trees

Ted Kosher

Colorful names like Tulip Poplar, Weeping Beech, Buckeye, serviceberry, and Elderberry are just a few of the many tree names that sound like nicknames almost, these trees from the West. They have a wide variety of uses, from providing broad shade to creating wind breaks. They will thrive with little care, making it perfect for the novice gardener. Many are easy to care for, but some require more attention than others.

The Trees

At the national cemetery in Geneva the trees have names, both unique and meaningful. A few of these trees have been笛过的, or at least written about in a meaningful way.

In the Garden

In the garden, trees are not just for ornamental purposes. They can also be used for practical purposes, such as providing shade or windbreaks. Trees can also be used as a natural form of pest control, by attracting beneficial insects that will help control other pests in the garden.

In the Community

In the community, trees are often planted for their aesthetic value, as well as their functional value. They can be used to create a sense of place, or to enhance the beauty of a public space. Trees can also be used to create a sense of community, by providing a space for people to gather and socialize.

In the Forest

In the forest, trees are the foundation of the ecosystem. They provide habitat for a wide variety of wildlife, and they also help to create a healthy ecosystem by providing oxygen and carbon dioxide.

In the Home

In the home, trees can be used as a source of natural light, or to provide a sense of privacy. They can also be used to create a sense of seclusion, or to provide a sense of peace and tranquility.
Young Franklin's first day in Philadelphia

"The Fable of the Parents Who Tinkered with the Offspring"

GEORGE AGE

A startled couple purchased a new baby, Joseph Franklin, from a local midwife. Joseph was nine months old, and his parents were overjoyed to welcome him into the family.

In the first few weeks, Joseph showed great promise. He slept soundly through the night and ate well. His parents were thrilled with his progress.

However, as Joseph grew older, his behavior began to change. He would often cry inconsolably throughout the night, and his appetite seemed to dwindle. His parents were worried and sought advice from a local doctor.

The doctor diagnosed Joseph with a common ailment among newborns and prescribed a course of treatment to help alleviate his discomfort. However, the parents were not satisfied with the doctor's diagnosis and treatment plan.

They believed that Joseph's issues were rooted in a more fundamental problem, and they sought advice from a family counselor.

The counselor recommended that the parents work together to create a more nurturing environment for Joseph. They agreed to follow the counselor's recommendations and began to make changes in their home.

With time, Joseph's behavior improved, and his parents became more confident in their ability to care for him. They learned that sometimes the most significant changes can come from addressing the root cause of a problem rather than simply treating its symptoms.

By working together and making small adjustments to their lifestyle, the parents were able to create a more loving and supportive environment for Joseph. In doing so, they not only improved their son's well-being but also strengthened their own relationship as parents.
SUNDAY DRIVE

A book in my early spring years perfect timing to drive the new 2023 Hyundai Sonata. The all-new 2023 Sonata is Hyundai’s latest sleek and upscale sedan. I am very impressed with its design and technology.

Hyundai’s new Sonata, in April, we had the opportunity for a first look at the 2023 Hyundai Sonata on Highway 80 in Santee Canyon and in the Capital Reef National Park in Utah. The Hyundai Sonata is a vehicle that is new for 2023 and is available in two trim levels: the SE Limited and the Limited.

In the Capital Reef National Park, I was impressed with the Hyundai Sonata’s performance on the winding roads and the smooth handling on the smooth roads.

The Hyundai Sonata has a 2.5-liter four-cylinder engine that produces 201 horsepower and 191 lb-ft of torque. With an eight-speed automatic transmission, the Sonata accelerates from 0-60 mph in 7.7 seconds.

The Sonata also features a head-up display that projects speed, navigation, and other relevant information into the driver’s line of sight. This helps keep the driver’s eyes on the road while providing important information at a glance.

The Sonata’s interior is spacious and comfortable, with plenty of legroom and headroom. The front seats are very supportive and comfortable, while the rear seats provide adequate legroom.

The Sonata also features a 10.3-inch touchscreen display that is easy to use and features Apple CarPlay and Android Auto connectivity. The display also has a high-resolution camera for an excellent view of the road.

In conclusion, the 2023 Hyundai Sonata is a great car for those looking for an upscale sedan with a sleek design, impressive performance, and a comfortable interior. It is a great choice for those looking for a car that is both stylish and practical.
