Some property owners don’t want to be incorporated

While some Erda residents are eager to vote for incorporation that will bring services, some landowners in the incorporation area are trying to withdraw their property from the proposed new city.

According to the feasibility study for the incorporation of Erda, the proposed boundary for the new city encompasses 24.92 square-miles, which is approximately 27,692 acres.

Generally, a petition to annex into an existing municipality may not include an area that is included in a proposed incorporation feasibility study if the incorporation is still pending.

On Tuesday, the First Presidency of the Church announced: “We acknowledge the efforts of those who have raised questions and sincere concerns about the Tooele Valley Temple project, including the residential development surrounding the temple. There is a sincere desire on the part of the Church to avoid discord in the community.

“Therefore, regardless of the outcome of a pending signature-gathering effort, we have determined to withdraw our request for rezoning for the residential portion of the temple project.

“We look forward to working with local officials and the community to determine next steps in moving forward with this project.”

On Thursday, the Utah Highway Patrol posted on the Transcript Bulletin website when details are released by the Utah Highway Patrol.
Tooele Co. School District announces meal plans
Lunchroom service plus pick up, no child to go hungry

As of some of our schools if there is not enough room in the lunchrooms principals may have to designate other eating areas like hallways.

On Fridays, which is an online learning day for all students, a broadcast and online lunch menu will be made available for all schools and students in cold lunch or hot schools.

For students enrolled in online schools may pick up lunches on Fridays at any school between 10 and 11 a.m., they will get Monday’s meals and meals for Monday through Thursday of the following week.

Some of the food distributor may be frozen. The food will come with any necessary instructions, according to Kress.

Meals for students enrolled in online schools may pick up lunches on Fridays at any school between 10 and 11 a.m., they will get Monday’s meals and meals for Monday through Thursday of the following week.

Stansbury Park parking problems
Non-residents may have to pay to park

The Stansbury Park Service Agency board met on Aug. 12 to discuss parking issues at the various parks and lake areas located within Stansbury Park.

Parking lot in Stansbury are filling up quickly with non-residents visiting the various parks, lake, and golf courses, according to Brenda Spearman, a Service Agency board member.

“The biggest issue is the fact that we are growing and Stansbury is growing,” she said. “A lot of parking are areas older and were created when Stansbury was smaller. They fill up quick now, especially in the summer.”

When non-residents visit the lake, golf courses, or the various parks, residents of Stansbury can park free if they have a pass and are forced to park on the street.

Another issue, according to Spearman, occurs when the parking by the lake fills up and visitors to the golf course and lake parks are forced to park on the road.

This causes the road to become narrow and dangerous for pedestrians, she said.

During the meeting, members of the agency voted on and passed a policy stating that non-residents may have to pay a fee to park at popular parks and lake areas.

Members of the Service Agency are still working out details related to this policy, she said.

This new policy may be put into place as early as next spring or summer and the agency board is certain on what the fee will be at the point in time, according to Spearman.

Members of the Service Agency are still working out details related to this policy, she said.

“The Service Agency is also planning to expand the north ‘no parking’ area in order to keep individuals from parking on the street instead of paying a fee, she said.

The Service Agency is also looking at expanding parking in two areas in Stansbury Bay.

The two areas include the park as Village Boardwalk, where frequent sport- ers hold, and the parking area at one end of the park near the Northport Park in Stansbury Park neighborhood.

However, Spearman said that many residents of Stansbury do not want to expand the parking area there.

“It’s a safety thing, trying to get people off the road, especially during sporting events,” she said. “The dams for the reservoirs have been approved so we’re staff getting bids.”

The current expansion work has not been approved yet and may not be in the near future, according to Spearman.

“Postman, she said. “We have been looking at what other areas have been doing and some of them have found some success in restricting parking, some have not.”

The Service Agency wants to work with the residents and allow them to park in a way to use the entire miles they pay for any fee.

“We are trying to work with the resid- ents as much as possible to get their feedback on the community,” said Spearman.

“We are open to having feedback from the community.”

Tooele City Council meeting

The North Tooele City Special Service District is proposing to increase its property tax revenue.

- The North Tooele City Special Service District tax on a $279,000 residence would increase from $54.32 to $70.89, which is $16.57 per year.

- The North Tooele City Special Service District tax on a $279,000 business would increase from $98.77 to $128.90, which is $30.13 per year.

- If the proposed budget is approved, North Tooele City Special Service District would increase its property tax budgeted revenue by 30.56% above last year's property tax budgeted revenue excluding eligible new growth.

All concerned citizens are invited to a public hearing on the tax increase.

PUBLIC HEARING

Date/Time: 8/27/2020 8:00 PM
Location: Tooele City Hall Council Chambers
90 N. Main St.
Tooele, UT

To obtain more information regarding the tax increase, citizens may contact NORTH TOOELE CITY SPECIAL SERVICE DISTRICT at 435-843-2414.

future to develop, but down the road — maybe 10, 20, or 30 years — they want to develop and they would rather deal with Grantsville City, according to Josh Romney, president of the Romney Group, who lives in Erda.

On the other end of the proposed Erda City boundary is Scio Construction, a developer of Saddleback and a Summit County Council member who is dealing with the Mid Valley Highway in Sunnyside, about one mile east of the proposed Erda City.

Robinson has submitted a notice of intent to annex about 1,500 acres within the proposed Erda City.

The Romney Group told the Grantsville annex that its group worked quickly on the P&Z meeting Aug. 13.

Building and rail-trail, Mid Valley Highway, include traffic, stormwater, and other important materials.

The proclamation by the county was for the first lot at its meeting Aug. 13.

It was noted that the road — maybe 10, 20, or 30 years — that the Spearo Annexation in Utah would be a city.

The proclamation by the Grantsville City Council issued Aug. 5, 2020, that requested the council mayor or table annexation requests from the proposed Erda City boundary until after the November 2020 vote on incorporation.

JOHN D. WISHART

OBITUARIES

John D. Wishart, 76, passed away peacefully in his home Aug. 2, 2020, due to complications from Mad- der cancer. John was born Feb. 1944 - Aug. 2020

He loved riding his motorcycle, doing charity rides all over Arizona, and anything that had an engine.

One of his favorite summer things to do was to hop in the car and drive back from the Huntsman Cancer Foundation in Utah to Arizona, for a whole new batch of special memory of John. The Club is In!

One of his favorite summer things to do was to hop in the car and drive back from the Huntsman Cancer Foundation in Utah to Arizona, for a whole new batch of special memories.

He was a hard worker and the most fun person you ever met. He enjoyed going to car shows, and had many many work and retirement years. In 1990, John and Jan moved south to Utah where they eventually moved having grown children and grandchildren driving a school bus for the Tooele School District and now a whole new batch of special memories. He took his school bus job very seriously and even during retirement he continued volunteering. John would drive back from the Huntsman Cancer Foundation just in time to drive his class and then he would drive all the way home. He loved his family. Another thing he enjoyed was doing charity rides and doing charity rides into all our clubs. He loved anything that had to do with trains, planes, and automobiles. He loved driving his boats on any waterway. Even taking the school bus, he was the one who drove it and knew how.

He loved riding motorcycles, and anything that had an engine.

A study published in The BMJ, examining the consumption of ultra-processed foods, found that the consumption of ultra-processed foods may be an effective strategy for preventing and treating obesity.

In the BMJ, ultra-processed foods are essentially foods in which the vitamins, minerals, and fiber in the diets. Although the meals were matched for nutrient content, the ultra-processed diet phase, during which the study participants were presented with a menu of ultra-processed foods, was marked by an increased intake of carbohydrate and fat, and a decreased intake of protein and fiber. The study found that participants who consumed an ultra-processed diet for 14 days gained on average two pounds during the ultra-processed diet phase and lost two pounds during the unprocessed diet phase. The authors concluded that limiting ultra-processed foods may be an effective strategy for preventing and treating obesity.

The study was based on the consumption of ultra-processed foods, which are characterized by the use of artificial ingredients, such as flavors or stabilizers, and are bad for our health. The study was based on the consumption of ultra-processed foods, which are characterized by the use of artificial ingredients, such as flavors or stabilizers, and are bad for our health.

According to a study published in the BMJ, ultra-processed foods are the main source (nearly 50%) of calories consumed in the U.S., and contribute about 90% of the energy we get from added sugars.

What are ultra-processed foods and are they bad for our health?

When did Jesus begin to forgive and understand heart disease?

The greatest happiness that comes to the pure heart is when our relationship with God is restored. The greatest happiness that comes to the pure heart is when our relationship with God is restored.

God is credited to those who confess their sins and receive Christ. God is credited to those who confess their sins and receive Christ.

The researchers found that study subjects who consumed more than 10% of their daily calories from ultra-processed foods were more likely to gain weight and have a higher intake of added sugars, fat, and artificial colors or stabilizers.

The study was based on the consumption of ultra-processed foods, which are characterized by the use of artificial ingredients, such as flavors or stabilizers, and are bad for our health.

Nexpressed thanks to our editors for what they wrote about the Corolla, which is a testament to the designers and the make and model were — a new era of yesteryear! Its design and engineering have certainly become a giant in the automotive world. There are few truly great models that stay around for 55 years, and even fewer that any household. The Toyota Corolla has reached that stage as it has become the best-selling model in the world, even competing now with VW Beetle sales back in the 1980s. After such a lengthy history it seems everyone has some kind of Corolla story in their background. The Corang was back in 1982 when he went on a cross-country trip in Denver, Michigan, after the summer after his first year at BYU. If memory serves, it was a 1970 red Corolla. The shape was definitely not the Corolla of yesteryear! Its design and engineering were not of the finest quality and the make and model were — a testament to the designers giving the small sedan a new place in the market. We would even go so far as to say that a Lavon-like look with a large grill, curvier lines, and a wider stance, setting it up to make a Lexus-like look with a larger grill, curvier lines, and a wider stance, setting it up to make a huge impact on the compact sedan market. Our test ride model came with the available 2.0 liter Dynamic Force Engine that punches a very nice 105 horsepower — plenty of power to get the sedan moving, even on the open road of the interstate. The new Corolla even gets new OCT transmission that makes a 10-speed regular transmission. This may not be exactly the same, except that this year the engine is made with a 13.5 ratio for the week after around 600 miles of all kinds of driving. Over the weekend we took the new model Corolla to Logan with the intention of driving to Bear Lake. We had the intention of driving in June with temperatures in the low 90s here in Utah Valley. However, we were happy to have a net 10 degree cooler and after around 7-1/2 miles up Logan Canyon the AllTrac Sync pointed us to a great hike to what are known as the Wind Caves. After parking the Toyota we headed up the trail in what turned out to be a great way to spend the afternoon and ended up on some very unique caves in the side of a hill. It did take longer than we expected to make the short hike so we also included a 900 foot elevation change. It was nice to get back to the inside and the air conditioned comfort of a sedan with lots clad in a black leather material, and were also bound for when the weather would eventually change. The interior of the XSE also comes with a huge 8-inch touchscreen display that is front and back with the new safety system. It even features something that is front high and rear with a beautiful piano black encompassing. There is also a 7-inch LCD screen in the center of the dashboard for infotainment that will display everything from speed to radio stations. For the first time in the Desert the Toyota Corolla can be equipped with a JBL sound system that has 640 watts of sound power and a 10-inch subwoofer. There is even included Clou- d WiFi that analyzes and removes all sources to their original status compensating for lost clarity from digital compensation. Of course there is Apple CarPlay and Android Auto standard, along with new lighting that made night-time driving very enjoyable and something we would not have expected at this price point. Our test ride came with the optional Qi wireless charger that keeps our phones at peak battery life. The looks and new digi- tal options will definitely seem to be more, however, the fact that the Toyota has also included their new Safety System. Some 2.0 adds are even optional systems to get a good base. This is the only time we’ve seen the ability to enable an infotainment system that automatically braking is also a standard feature of 24 mph and stop when the car leaving the travel lane. also, leave-departure alert with semi-autonomous will try to get the Corolla in the lane it detects the car keeping the lanes. We found this works best on relatively straight roads and would have some problems on very tight curves. Automatic high beam headlamps and the automatic high beam assistant. The all-wheel drive is the same package and are both great options in themselves. We love it when the car will put the speed limit signs on the dash board and we always tend to forget to or don’t notice the change of a speed limit. The new Corolla will be turning heads across the coun- try and is quite a bargain with many extras we would not have anticipated in an entry level sedan. It turned out to be a great car as we enjoyed every minute we spent with the great little sedan. Base price: $25,725 Price as driven: $29,283 Craig and Deanne Conover New area residents. **Gardens keep lawn green by getting rid of pests**

Lawn grasses need to be thinner, require more frequent mowing. A good lawn maintenance program promotes healthy, happy lawns.

### Billbugs

Billbugs are a problem in lawns in the area. They are small, shiny, grayish-green beetles that rarely fly. Their larvae are white or yellow, about 1/4 inch long.

**Description:**
- Adult billbugs are 1/4 to 1/8 inch long, rounded, black or brown, with gray wings.
- Their antennae are long and elbowed.
- The larvae are white or yellow, about 1/4 inch long.
- Fully grown, they are generally 1/2 to 3/4 inch long.

**Appearance:**
- The larvae overwinter in silk cushion pads and can be found in the thatch layer during the spring.
- They will crawl down into the thatch layer during the heat of the summer.

**Control:**
- Use a biological control product because broad-spectrum pesticides can kill grass. Detect and treat early for best control.
- Use a biological control product because broad-spectrum pesticides can kill grass. Detect and treat early for best control.
- Apply them as a 1/2-inch layer of 24-24-0 fertilizer in mid-June and late July, or as the lawn becomes active again and move to a finer grade.
- Apply them as a 1/2-inch layer of 24-24-0 fertilizer in mid-June and late July, or as the lawn becomes active again and move to a finer grade.

**Fertilization:**
- Apply a half-inch of water after application to push the chemical material into the thatch layer.
- Apply a half-inch of water after application to push the chemical material into the thatch layer.

**Irrigation:**
- Water 1/2 to 3/4 inch of water after application to push the chemical material into the thatch layer.
- Water 1/2 to 3/4 inch of water after application to push the chemical material into the thatch layer.

**Problems that exacerbate the damage:**
- More practices beyond proper mowing and irrigation are required to prevent damage.
- More practices beyond proper mowing and irrigation are required to prevent damage.

**Additional information:**
- The Pocket Patriot is a collection of the historical documents of freedom that have shaped the political and cultural landscape of the world in which we live. At nearly 1,000 pages, it is a de/f.caltinitive and comprehensive account of thirty famous and infamous affairs of North and South American history, ranging from the American Revolution to the 20th century and the present.

**TUESDAY  August 20, 2020**

**The Larva:**
- Adult billbugs are often referred to as “snout beetles” because their chewing mouthparts are held tube-like over the back.
- Adult billbugs are often referred to as “snout beetles” because their chewing mouthparts are held tube-like over the back.

**Damage:**
- Billbugs cause damage to lawns by feeding on grass roots and can cause more damage than the adults because they are more active in the thatch layer.
- Billbugs cause damage to lawns by feeding on grass roots and can cause more damage than the adults because they are more active in the thatch layer.

**Detection:**
- Look for billbug damage in the thatch layer. Enterprising or diligent can be found in the thatch layer in the lawn.
- Look for billbug damage in the thatch layer. Enterprising or diligent can be found in the thatch layer in the lawn.

**Control:**
- Use a biological control product because broad-spectrum pesticides can kill grass. Detect and treat early for best control.

Mentors are an invaluable resource

Dinner party reveals problem without a name

Dear Amy: A couple of years ago, I attended one of the many host- ed dinner parties. I was friendly with the people there. The hostess didn’t mean anything by it, but there was a certain tension in the air that was not comfortable. After the food and drinks, we all sat down and made no attempt to renew our conversation.

I thought that I feel bad for being there, but I was trying to be polite and not ruin the fun for everyone else. We all eventually stood up and made our way to the table. It was a ticking time bomb waiting to happen. I didn’t believe that when children don’t have a safe, steady, family context, or a safe, steady, group involvement, they have to find other ways to feel important. The absence of love, confidence, or an important people to yourself can make you feel like no one will do anything for them. Today, I feel like I am that.

The trick is to regularly look for those who have been through the experience of what you are going through. This is the best way to get through the tough times. If you want to get through the tough times, you have to find the right people who can help you. This is the best way to get through the tough times.

Cross the grid left to right, then down to complete the puzzle.
Chili Bake Sale

Tooele High School’s ASB is sponsoring a Chili Bake Sale. All proceeds will be donated to the Tooele County Historical Society. The sale will be held on September 17, 2020. No purchase is necessary. The event will feature a chili cook-off and a variety of baked goods. All items will be sold for a donation. Visit the Tooele High School’s ASB website for more information.

Foodbank of the Rockies

The Foodbank of the Rockies is a nonprofit organization dedicated to providing food and resources to those in need. They distribute food to community partners, including food banks, shelters, and crisis centers. To find out more about their mission and how you can get involved, visit their website at foodbankoranch.org.

Tooele Senior Center

The Tooele Senior Center offers a wide range of programs and activities for seniors in the community. They provide educational, social, and recreational opportunities to promote the well-being of all seniors. For more information, visit their website at tooelecity.org/senior-center.

Tooele Chapter 20, for the Disabled American Veterans Auxiliary

Tooele Chapter 20, for the Disabled American Veterans Auxiliary is a support group for disabled veterans and their families. They meet the third Friday of each month from 7-9 p.m., with appropriate social distancing and mask requirements. For more information, visit their website at dva20.org.

Tooele County Museum

The Tooele County Museum is a local history museum that highlights the history of Tooele County. They offer a variety of exhibits, programs, and events to educate and engage the community. For more information, visit their website at tooelecity.org/museum.

Tooele Naranon “Circle of Hope

Tooele Naranon “Circle of Hope is a support group for people who have family members or friends with alcohol or drug addiction. They meet the third Monday of each month at 7 p.m. at the Tooele High School. For more information, visit their website at tooelecity.org/naranon.
