**Tooele City police catch mystery graffiti artist**

Unlikely clue leads to arrest

CHOLLY SUTTON

The Tooele City police have caught a man who they said and has committed over 40 acts of graffiti vandalism around the city. The arrest was made after detectives were able to discover the vandal’s identity, according to Sgt. Jeremy Hansen, Tooele City Police Department’s public information officer.

Beginning in early summer 2019, police started using a graffiti tag appearing around town with the letters D and E, according to Hansen. However, the person responsible for the graffiti eluded Tooele City detectives.

Meanwhile, Tooele City police

**Grantsville hires full-time engineer**

MARK MAYS

“Having and industrial development in Grantsville which makes a significant impact on the infrastructure is a major task.”

So far, Grantsville has hired an engineer to help with engineering needs, but now the city is on the lookout for a full-time engineer.

“We have a lot of projects going on now where we need an engineer,” said Mayor Brent Marshall. “It’s not unusual to have a lot of work, and we need someone who can help us.”

Timm Dixon started his job as full-time engineer Monday. The City interviewed five candidates for the position and hired the most qualified engineer to help them when the best candidate was identified. The candidate was then interviewed and selected. The job includes $95,000 a year, with a contract through the beginning of February.

**In midst of pandemic, flu vaccine is still important**

CHOLLY SUTTON

While the COVID-19 pandemic continues, the Tooele County Health Department reminds everyone that flu shot season is approaching.

“While some people incorrectly believe getting a flu shot is worthless or gives you the flu, it actually is one of the most important things you can do for your health and others — especially in the middle of the coronavirus pandemic,” said Amy Line, public information officer for the Tooele County Health Department.

Health experts recommend the flu vaccine for nearly every demographic, including children, adults, and elderly individuals.

**Tooele City Council looks at annexation notices of intent**

In midst of pandemic, flu vaccine is still important

TIM GILLIE

The Tooele City Council got a look at a map of notices of intent to file a petition to annex areas into Tooele City.

The map included 15 parcels, some of which are outside of Tooele City limits.

The Tooele City Council will consider the map at a future meeting.

Life of Wilma Swenson celebrated on softball field

Tooele City offers small business grants

Deadlines approaches for pandemic child nutrition assistance

Joel J. Dunn

At the Deseret Peak Complex, the lights turned on Aug. 19, 2020, as the softball field was opened for the first time. The lights signaled the start of the Line Drive for Life, a partnership between Tooele City and Deseret Peak Baseball. The event was held to honor families who have lost loved ones due to COVID-19. The proceeds from the event will be used to support families who have been affected by the pandemic.

The Line Drive for Life is a softball tournament that raises money for families in need. The tournament is open to all ages and skill levels, and it is hosted by Deseret Peak Baseball. The tournament will be held on Aug. 27 and Aug. 28 at the Deseret Peak Complex in Grantsville. The event is free for spectators, and all proceeds will go to help families who have been negatively impacted by COVID-19.

The Line Drive for Life is part of a larger effort to support families during the pandemic. Tooele City has established a grant program to assist businesses with the economic impact of COVID-19. The grant program will provide $1,000 to $10,000 in funding to eligible businesses. The grant money will be used to cover operational expenses such as rent, utilities, and payroll.

The grant program is designed to help small businesses that have experienced a downturn in revenue due to the pandemic. Applications for the grant program will be accepted until Sept. 15, 2020. Businesses that are interested in applying for the grant can visit the Tooele City website for more information.

The Line Drive for Life and the grant program are just two examples of the efforts being made to support families during the pandemic. Tooele City is committed to helping families in need and will continue to support them in the future.

Eugene J. Cullinane

The grant program is designed to help small businesses that have experienced a downturn in revenue due to the pandemic. The program is open to businesses that have been in operation for at least one year and that have experienced a loss of more than 20% in revenue. The grant money will be used to cover operational expenses such as rent, utilities, and payroll.

Applications for the grant program will be accepted until Sept. 15, 2020. Businesses that are interested in applying for the grant can visit the Tooele City website for more information.

In 1970, race car driver killed in crash at Bonneville Salt Flats

The Tooele Transcript Bulletin has published a flashback of the week of August 27, 1970. Here is a snapshot of the events that occurred during this week of August.

**August 26, 2021**

Tooele County's third major fire of the summer charred over 12,000 acres in the Cedar Mountains and threatened to begin burning into unيمه.

The fire started on Sunday at about 3 p.m. and by Monday morning it had grown to about 4,000 acres. By Monday night it had doubled in size.

Wild horse habitat was being burned and a Type Two Incident Management Team was on site to coordinate fire activity.

THE GRAFFITI TAG D AND E ON A BUILDING IN TOOELE CITY.
John Joseph O'Donnell

Jill Fernau Woods

John is the son of Ronald and Maria O'Donnell of Medford, Massachusetts. He was a 1999 graduate of Medford High School. He attended the University of North Carolina at Chapel Hill and North Carolina State University and graduated in 2003 with a master's degree in electrical engineering.

Jill is the daughter of David and Lorraine Fernau of Medford, Massachusetts. She graduated from O'Youville College in 1976 with an associate degree in paralegal studies and from the University of Phoenix in 2005 with a bachelor's degree in human resources. She was a paralegal for a law firm in Medford, Massachusetts, and a legal secretary for a law firm in Boston, Massachusetts.

John and Jill were married on June 13, 1992, and have three children: Rachel, born in 1993; Nicholas, born in 1995; and Emily, born in 1998. They have lived in Medford, Massachusetts, since 1992. John is a software engineer at a large technology company in Boston, Massachusetts, and Jill is a legal secretary at a law firm in Boston, Massachusetts.

John and Jill enjoy spending time with their children and family, attending Boston Celtics basketball games, and traveling to New England and the East Coast.

Jill is also a member of the Medford Historical Society and a volunteer at the Medford Public Library.

Jill passed away on August 25, 2020, after battling an extended illness. She was 67 years old.

Survived by her husband, John; their two children, Rachel and Nicholas; and her mother, Lorraine Fernau. Services will be held at the Medford Memorial Funeral Home, 110 S. Main St., Medford, Massachusetts, at 10 a.m. on Wednesday, August 26. Contributions in her memory may be made to the Medford Historical Society or the Medford Public Library.

Veronica Villanueva, Editor

Jill was preceded in death by her mother, Lorraine Fernau, in 2017.

Stansbury faces another tough test

Tooele, Granthivealt-gritt the road in Week 3

Darren Vaughan

For two of Tooele County’s three high school football teams, the season region locations on the non-region, while the other is near the state’s playoff-qualifying parameters. For Stansbury and Tooele, Week 3 presents one final chance to work out the bugs before region week-10 opener. The Stallions and Buffaloes have been focused through the first two weeks of the season, and this week should be no different.

Meanwhile, Granthalls pull together a dominant defensive performance last week, and will need to be at it again in its first region game of the season — a game that pits the Cowboys against one of Utah’s Class 3A’s most accomplished teams.

Here’s a look at this week’s games.

Granthalls vs. Stansbury (2-0) at Stansbury Stadium, Stansbury High School, 5000 S. Way, Stansbury Park, on Friday, 7 p.m.

FROM THE SIDELINES

Let’s cut each other a break here

L
ike so many, we are all a little tamer into the wildness of high school sports season that any of us can remember, so far, we’ve gotten through it mostly unscathed — at least compared with the last three seasons. But why was that? Vols, your local high school teams. The Grantsville volleyball team is getting its fair share of wins, losses and draws. But in the past two weeks, it has been the win column that has been the most consistent. The Grantsville volleyball team is getting its fair share of wins, losses and draws. But in the past two weeks, it has been the win column that has been the most consistent.

First off, the team is playing a lot of games. However, we’re not the only ones who have been good at this. In fact, the Grantsville volleyball team is getting its fair share of wins, losses and draws. But in the past two weeks, it has been the win column that has been the most consistent. The Grantsville volleyball team is getting its fair share of wins, losses and draws. But in the past two weeks, it has been the win column that has been the most consistent.

Technology better than ever in the 2020 Honda CR-V Hybrid

A few years of rethinking and retooling has paid off, now we have a vehicle that we want to drive. Now that it is ready to hit the market, we are all excited to see how this new CR-V will perform. As acreature that has been around for over 30 years, the CR-V has always been a popular choice for consumers. However, with the ever-changing automotive industry, it is important to keep up with the latest advancements in technology.

SUNDAY DRIVE

To start our week, Dennis and Rosemary Conover spent more of the day Friday and Saturday touring Utah Valley for the Annual Utah Home Builders Parade of Homes. This year the Parade of Homes featured 15 foods that boost your immune system.

The Honda CR-V is known for its reliable performance, and this year it is no different. With its hybrid system, it offers a smooth and enjoyable drive while also being environmentally friendly. The CR-V is designed to give off an audible alert to pedestrians that varies in volume depending on speed. It made for a great first-time impression with us and definitely made the list when we are looking for a new SUV.

The Honda CR-V is a popular choice for consumers due to its reliable performance and environmentally friendly hybrid system. With the ever-changing automotive industry, it is important to keep up with the latest advancements in technology. Honda continues to push the boundaries of what is possible in the automotive industry, and the CR-V is a prime example of this.

This column was originally published Aug. 17, 2020. It has been updated by the author.

"What is eating you?" you might ask your grandma, who is a master gardener, or whoever in your life you look up to when it comes to food. The answer is eating you! The 2020 Honda CR-V Hybrid is a great example of a vehicle that is designed to give you a smooth and enjoyable drive while also being environmentally friendly. The CR-V is designed to give off an audible alert to pedestrians that varies in volume depending on speed. It made for a great first-time impression with us and definitely made the list when we are looking for a new SUV.

**Boost**
containing page from B13

They’re also a rich source of beta carotene, flavonoids and vitamin C, which your body converts into vitamin A to protect your eye and skin health. Brussel sprouts, broccoli and cauliflower contain vitamin K and vitamin C. It’s also packed with nutrients. Both sprouts and broccoli, which may both decrease your risk of developing certain cancers such as breast, may each harbor a compound that helps convert vitamin C to vitamin E, which is known for preventing skin damage and heart disease.

**Ginger**

Ginger may help decrease your weight, such as allicin. This is a compound found in garlic that you two are basically similar, and its health benefits are similar, but our bodies need it so that their immune cells can function at maximum efficiency. Variety of shellfish that is high in anti-inflammatory fats, such as salmon, cod, lobster, and mussels. Keep in mind that eating shellfish such as salmon, cod, and lobster, they are more than just the meat. Their skin and their bones are rich in omega-3 fatty acids.

**Roofing & Siding**

Garlic is found in almost every cuisine in the world. It adds a little zing to food and it’s a must-have for your immune system to help fight diseases. Clinical trials have shown that garlic is effective in lowering blood pressure and cholesterol. One study found that garlic can lower blood pressure by 10% or more. Garlic is also effective in reducing the risk of heart disease.

**Broccoli**

Broccoli is supercharged with nutrients and antioxidants. It adds a lot of fiber to your diet, which is great for digestion. Broccoli is also a great source of vitamin C, which is important for immune function. It contains nearly half the selenium of other vegetables. Just one ounce contains 13% of your daily recommended amount of selenium.

**Spinach**

Spinach made the list not just because it’s rich in vitamin K, but also because it contains lutein and zeaxanthin. This antioxidant-rich green can help prevent age-related macular degeneration and cataracts. It also contains high amounts of vitamin A, vitamin C, and vitamin E.

**Sunflower seeds**

Sunflower seeds are full of protein, fiber, and healthy fats. They are a great source of vitamin E, as well as vitamin B6. Vitamin E is important for maintaining immune function, and vitamin B6 is necessary for the production of red blood cells.

**L-theanine**

L-theanine may aid in the production of dopamine, which is a neurotransmitter that helps regulate mood and anxiety. It may also help improve cognitive function and reduce stress.

**Green tea**

Green tea is rich in antioxidants and is known for its anti-inflammatory properties. It can help reduce inflammation and may have a positive impact on your health.

**Olive oil**

Olive oil contains high levels of oleic acid, a monounsaturated fat that has been shown to improve heart health. It also contains vitamin E, which is a powerful antioxidant. Olive oil is used in many curries and other dishes around the world.

**Rosemary**

Rosemary is a herb that has been used for centuries for its health benefits. It contains compounds that have anti-inflammatory and antioxidant properties. It can help reduce inflammation and may have other benefits, such as improving brain function.

**Turmeric**

Turmeric contains a key ingredient called curcumin, which has been shown to have many health benefits. It can help reduce inflammation and may have other benefits, such as improving brain function.

**Quercetin**

Quercetin is a compound found in foods such as onions, garlic, and broccoli. It has been shown to have anti-inflammatory and antioxidant properties. It can help reduce inflammation and may have other benefits, such as improving brain function.

Fresh fruit, berry pie is late summer treat

BY LUCIE WINBOURNE

I love summer. While my school-age child accelerate and the juicy peaches, a younger sojourn can press the simple cobblestone crust into a pan. And you do not have to be a pastry chef to rave reviews Labor Day weekend.

The refreshing dessert will...to gather the sweetest peaches, nectarines, kiwi or unpeeled plums.

FRESH FRUIT AND BERRY PIE

For the crust:
1 1/2 cups all-purpose flour
1 cup cold butter, cut into small pieces

For the filling:
2 cups peaches, quartered, pitted and chopped
2 cups nectarines, quartered, pitted and chopped
1/2 cup blueberries
1 egg yolk
1/2 teaspoon salt
5 tablespoons sugar
3 tablespoons cornstarch
6 tablespoons orange juice
3 tablespoons butter, melted

The pie was crusty and visually appealing. The shortcrust pastry was deftly rolled out onto the pie pan, then baked in the oven until golden brown and crispy. The peaches and nectarines were cooked until tender, and the blueberries added a burst of color and sweetness. The pie was served hot, drizzled with whipped cream, and garnished with a sprig of mint. The reviews were overwhelmingly positive.

The preparation of the pie was straightforward and enjoyable. The peaches and nectarines were washed and quartered, and the blueberries were hulled. The crust was made with flour and butter, and the filling was created with peaches, nectarines, and blueberries. The pie was baked in a preheated oven at 350 degrees Fahrenheit until golden brown and crusty. The pie was then allowed to cool before being served.

The use of fresh fruit in the pie added a delicious sweetness and a burst of flavor. The peaches and nectarines were plump and juicy, and the blueberries added a pop of color and a bit of tartness. The crust was perfectly baked, with a firm and flaky texture.

Overall, the pie was a delicious late summer treat, and it was enjoyed by all who tasted it. It was a delightful way to celebrate the end of summer and the beginning of fall.
Flowers

Insecticides are moderately useful for controlling these pests but they hold in the background where snows are important. All of these chemicals are several advantages to using insecticides and monocrotophos is that is lethal to carpet beetles but to monotonic mites, bees, and many other insects. The larvae onto the treed leaves and leafy green their are used. Within hours, it stops eating and the beetle will die. It is the active ingredi- ent in many insecticide sprays. Sprays, board, before damage is done. Once the67, studies of carausers are more suscep- tible to BT than other grass. The tips and bottoms of leaves are the solution sprayed off. You may have to reapply if the pest is not such a good

Tips for the Week
1. Fertilize lawns every six weeks.
2. Watch for tomato hornworms and control by hand picking or spraying with Bacillus thuringiensis (BT), the bacteria often used to control cabbage and potato worms.
3. Watch for gypsy moth caterpillars and control by hand picking or spraying with BT.
4. Watch for white grubs in lawns and control with a soil insecticide.
5. Watch for Japanese beetle grubs and control with a soil insecticide or a systemic granular.

A mother’s journey through her child’s battle with cancer

“A mother’s heart,” describes the roller coaster ride a family endures when a child is diagnosed with cancer and battles courageously for seven years. It is the true story about the faith of a child, the incredible skill and care of her physicians, and the caring power of God in our great God.

Q: I believe strongly in social justice and know there are other relevant forms in the mix at our protests but don’t see how protests alone will change society. What is your take on our current protest and what likely outcomes do you see in the social justice movement?

A: In any important social evolution there’s a polarization of opinion and then an integration of those opposites into a more mature society. We are in the time of polarization right now. Protests don’t create solutions; they do put the spotlight on problems. Many protesters are peaceful and there is then the mix of those that seek to cause chaos and crime. For those just watching the protests it can be hard to know who is who.

I find most people are abso- tural in how they perceive recent events. Think back to the hippies. Authorities and the government were appalled at their protest in woodstock, rock and roll and disrupt the rules. Many of us in our youth thought our counter-culture was the brilliant innovation, and out of the bush children the people formerly known as hippies. Our society never learned from the mess and would never repeat.

Over the decades have experimented with new social ideals. Some hippies dropped out but most realized they needed to work with the “main” to change the “main.” The “main” can never be changed through a violent intervention. We can aim at the brilliant innovation, and out of the bush children the people formerly known as hippies. Our society never learned from the mess and would never repeat. It is in this time again allow with more violence involved. We don’t seem to show up on the battle front of social transfor- mation change just because

The Americas: American cultural landscapes

A comprehensive treatment of this genre in both American and Canadian

American’s History Brought to Life

Landscape Painting from Tierra del Fuego to the Arctic

A bold and richly illustrated survey of American cultural landscapes and in- teresting trivia. Did you know the Scots coned painted by Andy Warhol. It’s a piece of thread that has become woven into the fabric of the old world to the new, from ice Cream to emaciated, its strengths and weaknesses, its triumphs and defeats.

The Queen is a piece of thread that has become woven into the fabric of the old world to the new, from ice Cream to emaciated, its strengths and weaknesses, its triumphs and defeats.
